Exploring The Southern Sierra: East Side

Synopsis

The network of outdoor trips described in this book explores the mountains east of the North Fork of the Kern River between the High Sierra to the north and the Tehachapi Mountains to the south. This book describes 150 adventurous trips: 15 car tours, 34 dayhikes, 28 peak climbs, 37 backpack trips, 25 bicycle trips and 62 equestrian outings (some trips double as more than one kind of outing). A 4-color foldout map depicting all trips is included.

Book Information

Paperback: 240 pages

Publisher: Wilderness Press; 3 edition (January 1, 1992)

Language: English

ISBN-10: 0899971288

ISBN-13: 978-0899971285

Product Dimensions: 9 x 6 x 1 inches

Shipping Weight: 12 ounces

Customer Reviews

. . . and as another reviewer notes, this is the only detailed guide to the area. Ruby Jenkins passed away last year, so this 1994 edition is likely to be the last ever. And there have been changes--for example, the 2000 Manter Meadow wildfire destroyed most of the Domeland Wilderness Area, focus of several trips in the book, so readers are advised to avoid Domeland hikes. I have found that members of the Kern River Valley Hiking Club, a group founded by Ruby Jenkins and accessible on a certain website, regularly take trips described in the book and respond to questions about current conditions, obscure directions and the like with good humor.

Some of this book needs to be updated, because of the construction of the wind turbines. I live on the edge of the PCT, so I got the book to find out what was in the area. The parts that I am familiar with are well-documented.

Still relevant, and very detailed, this book is worth the price simply for the map in

back.Comprehensive - and written with an uplifting tone that is contagious.

This was received in good condition and was exactly what I was looking for and am happy with the purchase. Thank you.

In his brief life, Jim Jenkins mapped out much of the Southern Sierra, including the Pacific Crest Trail in the region, and wrote two detailed guidebooks. Since his death in 1979 at the age of 27 his mother, Ruby Jenkins, has continued his work and updated his books on the region. This book is loaded with information on the geology, flora and fauna of the Southern Sierra. It also includes an excellent map of the region which is almost worth the price of the book. But the heart of the book is the descriptions of 150 trips in the Southern Sierra, and it is this part that is difficult to use. Unlike most guidebooks, trail descriptions and directions to the trailhead are in separate parts of the book. This necessitates a lot of flipping through the book. And, while the trips described by the book are broken down geographically, they are not separated by type. I would prefer to see climbs, drives, and bike routes in a separate section of the book than hikes. Still, this is the most comprehensive guide to the area, and very informative. Hopefully ease of use will improve in the next edition.

This 1992 edition is still a wonderful guide to the large area covered. My wife and I recently used the book to greatly enhance our touring, camping, and hiking experience during a trip to the Kern Plateau.
