On The Moon

Synopsis

This is an artist-led picture book, which introduces young children to the vastness of the universe, how far away the moon is, what gravity is and the concept of space travel through a gentle and captivating story about an imaginative little girl. Combining full colour illustrations with NASA photographs from the surface of the moon, this beautifully illustrated picture book takes young children on an amazing journey into outer space. The story's use of rhythmic text generates an evocative and friendly tale, taking children on a magical and informative journey. --This text refers to an out of print or unavailable edition of this title.

Age Range: 4 and up

Grade Level: Preschool and up

Customer Reviews

Another book to make learning interesting and fun and cause a desire for more reading and encourage more seeking in other books.

I ordered 3 books about space to read with my preschooler. This was by far the best for his age group. He has asked to read it every night since we got it.

I've read it to my 4 year old son every night since we got it. He loves it! It's easy to read and understand. This book is awesome for toddlers. The quality of the book is great, big size, nice pictures. One of our favorites.

Very good quality book, excellent story.

My 3 yr old son loves space. He has two space books, and this one is by far his favorite! The amount of text and the detail of information is perfect for his attention span. He loves the pictures, too. I like that he can see the real moon (in photos) with the comfort and familiarity of cartoons. Gives factual data in a fun way he can understand without being overloaded.

my son is 14 mos old and is facinated by the moon . i searched for a while to find a book with illustrations he would like and a story he would follow. he loves this book. actually he ripped the pages already the illustration is so nice that i think i am going to get a new one b/c i know we will be reading this for many years. the pics are great.

I purchased her "In the Castle" book, which had a list of several other of her books. My 2yo kept pointing to this book and he LOVES it. There are real pictures of the moon along with cartoon characters; he loves it just as much as her other one. Now we're waiting for The Dinosaur!

I bought my 4 year old an astronaut costume for Halloween and I wanted a book to explain what it was all about. This does a great job bring the subject to his level! We read it every night for three weeks - now it's down to every other day. I enjoy it as well - so far it hasn't gotten annoying to read nearly every night.
