She has published five refereed journal articles. In 1999, Ms. Glass was named Nurse of the Year by the Tennessee chapter of the Association of Women's Health, Obstetric and Neonatal Nurses.

Great book with all information in one source.

Like Oliver above, barely scratched and the NOVA app for book download did not validate. Gently scratched with a coin and the code came off! Not legible at all, highly defective code scratch off process.

Great book!

Love this book but wish it had practice review questions, links and pictures....

Excellent for new Nurse Practitioners!

The best family practice book out there. Easy to use and concise.

Great condition....brand new#

Love love love this book! It is straight to the point with all the pertinent information, which is much needed as a student when you are absorbing a ton of info! The older version of this book was required for my class but I opted for the this version because it has the latest greatest recommendations for hypertension as well as the new diabetes medications. A must have for any practitioners resource library!
