Customer Reviews

Gr 4-6-These well-designed titles present overviews of important national and global issues and their effects on current world development, especially in the United States. Environmental Protection provides information about how human activities impact the environment, especially global warming. Hydrofracking discusses the advantages and disadvantages of this method of extracting petroleum and natural gas, by pumping water and chemicals deep below the Earth's surface. Renewable energy sources are discussed as alternatives to this practice. Internet Inventors explains how technologies, especially the Web and wireless applications, are changing society. All three volumes have color photos on almost all the pages, and each one includes a "Living History" section that offers a brief introduction to primary and secondary sources with access to additional Scholastic

they are kind of fun though,overall I am very satisfied with it I have this setup at my main TV to switch between my HTPC, PS4 and PS3, and it works fine. I can't detect any quality difference between directly plugging them into the TV and using this, so that's good. Many critics say that this product is worth the price. I totally agree, because it is really good.A good buy! customer satisfaction is amazing These are just perfect They are ok, but had much better
