Black Belt Sudoku® (Martial Arts Puzzles Series)

Synopsis

At home, while commuting, during lunch hours—people around the world are eagerly working on Sudoku puzzles whenever and wherever they can! Created in the United States, these intriguing conundrums were originally called Number Place puzzles. Their recent rise in popularity began in Japan, where the name translated as sudoku. Here we've indicated the skill level necessary to complete each sudoku book in this series in the same way Japanese karate levels are ranked: by different colored belts. This is the Black Belt volume, filled with puzzles that will provide a sly, absorbing test for even the best, most proficient experts. It's impossible to complete only one sudoku at a time, because solving them is habit-forming!

Book Information

Age Range: 8 and up

Series: Martial Arts Puzzles Series

Paperback: 192 pages

Publisher: Puzzlewright (September 28, 2005)

Language: English

Customer Reviews

I love Michael Rios Sudoku. His games are fun and challenging but not so hard that you have to write in all the "helpers" to solve them. I have done several of his books and am back to doing Brown and Black Belt for the second time.

Really quite challenging and entertaining; difficult enough to keep me occupied without a frustrated feeling. Recommend this for both quality and quantity.

I have gradually worked through this series of books. I thought I was pretty smart now that I am on

the "most difficult" and final book of the series. But then my husband had me try a Sudoku puzzle from a different author and it wasn't even advertised as being very difficult, but it totally stumped me. I don't want to spend more than 20 minutes on a puzzle anyway, so this book worked for me - keeps my brain sharp - but don't know what I will do after this final book!!

Love Frank Longo's Martial Arts Sudoku series. The Black Belt level is delightfully challenging, but I recommend you work your way up through the different levels before you try this one. The quality of the paper in this book is also worth noting. Smooth to write on, and easy to erase.

These won't stress you out, but they're not the easiest, by any means. They're 'comfortable', so to speak. Great to do when you want a diversion but are not looking for a major challenge. I gave one to my sister awhile ago. She's just about on the last puzzle and was ready to erase the completed ones, so she do could do them again. I'm getting her another book, as a surprise. I'm almost finished with my book, and my husband has one, as well.

For those who enjoy having their brain used, this is the puzzle book for them.

If you are good at sudoku, you can start with the brown belt book, work your way up to this one, and then continue on to the second-degree black belt, third-degree black belt, or the beyond the black belt books. There are also easier books (white belt, green belt, etc.) but I haven't tried them. I really loved this one- it's very fun and just the right level of challenge.

This is a very convenient format. The squares are large enough to actually insert the candidates. I believe this is the top of this line. It would be as difficult as most people would wish to use. It does not include advanced puzzles which require Gordonian Squares.
