Ok book. Has some good ideas but nothing Earth shattering. Added some pics so you can judge content for yourself. I mean really....fold the leather; braid the leather; weave the leather....I think

most of us did that in camp when we were 10. :(Also what I don't like are books that are written just to sell a product brand of materials. This book scores low marks from me for that as well. Wish I would have just skipped this one....

This a very well put togetherbook. It has some really nice ideas. Thank you.

I love this book. So many unique ways to use leather in jewelry making. The directions are very easy to follow and will inspire you in your own designs.

Found a few things I really liked.

The cover photo pulled me in. There are a couple of good ideas in here, just not as many as I'd hoped.

These are not your typical leather designs. These are very modern and different from any previous ones I have seen. I lover over half of the designs and can't wait to try them all.

Lot of good info in the book and some pretty designs.

I did find some interesting information but as a whole, it was not a good read.
