Customer Reviews

This book offers so many helpful tips from when in the day to exercise to numerous different exercises that are easy to implement. By following the 7 day workout plan, you WILL feel so much better and have more energy at the end of the week. There's no need to be a gym buff to be healthy and have a great figure. This book isn't just for women over 50, but if you begin implementing the strategies in this book at a young age, then by the time you're 50, you'll already be fit with a great figure!

This book is special for me because it provided something for me and my mom to do together. Both of us don't prefer going to the gym, but we like exercising, and Sandy Schultz's book caters exactly to that. The author's experience and her words cut through everything redundant, and clearly outlines what prevents us from getting into a fitness routine. I loved how the key words are in caps so that is no way you're gonna miss 'em! There is a tender yet firm personal touch to this book through Sandy's own story. And from there she skillfully guides the reader into developing a lifestyle of fitness. And yes, there is a clear distinction here between fitness and workout. Her tips are backed by research too! I enjoyed the getting started section, where the first step is to clear out everything from the house that does not support a fitness lifestyle. So simple, so easy! The 7-day challenge is something my mom swears by. The exercises are simple and effective. I just wish there were illustrations. The diet plan completes the approach of this book. The motivating language and the author's belief in the reader really shines through and makes a huge difference.

In the beginning, Sandy lists the five reasons we don't exercise: work, kids, spouse, friends, distractions. Then, she smacks us with the simple truth--get off your duff, quit being lazy, quit making excuses, and quit expecting instant results. Take consistent action and you can eventually get the body you want. Sandy then tells us exactly what to do, how to do it, and what days to do it. She is so thorough that I would say you don't even need a trainer, nor do you need a gym for that matter. You just need motivation. So practice the "Let's Get Started" list in chapter 3, follow her 7-day challenge, and repeat these activities for a month. You'll be fit. You can be fit. Take action

now!

I loved this book for its no nonsense approach to fitness. I wish there were illustrations of the exercises but the author described them quite well. Her seven-day plan was great because the exercises were regimented in such a way that, upper body vs lower body, cardio, yoga, and stretches are completely laid out. If we accept this style of eating in which Ms Schultz describes: organic butter, coconut oil, no gluten, and no sugar, then we are bound to be healthier. With her health history as an overweight child, she is living proof now for years that this system works. Hooray and well done!! I will buy this book for my group of friends to work on our fitness program together! Buy this book!

I'm so proud of you Sister Sandy, and the awesome job you did in writing this book! Thanks for sharing all your personal advice in this book, to the world, as you are living proof "SANDY", that it does truly work!! And sweet potatoes do rock!! There are millions of us "baby boomers" out there, and as we gracefully age our bodies will slow down, it's a known fact. We will have to adjust and make changes with our diets and exercise to maintain our health. Modern technology has also changed our world into a far more sedative lifestyle. Many of us 50 plus, are in college, or new college graduates, seeking jobs in the health care field, most with computer sit-down work. It's crucial that we make changes in our diets and get our exercise like you stated Sandy, and stick with it, or we won't be around to enjoy the benefits! Thank-you again Sandy!!

This review is only for the Kindle version of the book. I have not seen the print version. I think the exercises in the book would be very useful, but there are no images or photos in the Kindle version. Detailed descriptions - yes. Pictures - no. That doesn't help me at all. There are repeated warnings to use proper form. I don't know how someone knows what proper form is without seeing it. Written descriptions of exercises are useless. For me, this version of the book was a waste of money.

This is a terrific book. I gave it to my mother, but I also use it myself to stay fit. Why? because it makes sense ... and the 7-day challenge is clear and straight forward, no fluff or nonsense, just simple, healthy exercises that anyone can do without expensive machinery like treadmills and stationary bikes.! Also, the author, Sandy Shultz, offers lots of common sense tips. The ones that grabbed me the most were: 1. Get up a half-hour early every morning to do a 30-minute workout (not difficult) and 2. Eat well 80% of the time (we're going to mess up, but if we

eat well 80% of the time, we'll be fine). The hook that got my mother to read the book: She'd get twice the energy if she got fit!

This book is AMAZING! Super easy to read and it's absolutely not only for those who are over 50. Sandy put together a detailed 7-day exercising program with exact what to do. The best part is that you can do it anywhere. In addition, the book offers extensive tips regarding staying healthy such as cooking with coconut oil. The most eye-opening part is that there are all sorts of exercises that you can do when you are cooking, driving, working at your computer, or even blow drying your hair!! Did you know that? This book tells you how!
