Other reviews should tell you what you would find in this book. I listened to Neil Sperry on the radio on weekends. So when I bought my new house I also decided to buy this book. A tree had already been planted in my front yard. So I used his botanical illustrations to determine what kind of tree it was. When designing my garden, I selected most of the plants from this book. On a visit to local nursery named Winston Gardens I found a beautiful wispy plant called River Privet. I planned this plant to hide the back fences and give the impression of the forest. I found the plant in a one-paragraph statement in Neil's book. It was everything that he said. I should have looked closer at his varieties paragraph. Maybe he was trying to tell me something. In his radio show he said that they have a tendency to takeover. Ha, not that cute little thing. Three years later the privets are beautiful. However I find my weekends picking up privet-ets from the lawn. Bottom-line; don't just buy the book for the pictures. Read it.
