Customer Reviews

For all health care professionals. Bestseller!

would be great to have a flip option, but covers the systems pretty well, fits in my lab coat pocket nicely. I use it for my clinical- NP student

this is an excellent clinical resource for learning how to do H&P.

Great guide to help outline assessment skills. Would recommend as a resource for beginning clinical experiences. I have no complaints.

It's good to have little reminders in case you're freaking out during a rotation lol

I love it. Product is as accurate and useful as the descriptions and reviews indicated it would be.

So small I need a magnifying glass. Seriously...only Superman can read this.

Must have for clinicals and those new to practice!

less cards than I thought
