Ocean Soul

Synopsis

Ocean Soul is a love story. It is a story of discovery. It is a story of hope. The story begins when a boy who loves the sea attends an event with underwater photographers and has an epiphany: "I had always wanted to explore the oceans, but I now understood how I would do this. I would do it with a camera. With sheer determination, hard work, and a little bit of luck the boy, named Brian Skerry, realized his dream with more than 20 awe-inspiring articles for National Geographic magazine. Now, with Ocean Soul, he showcases his stunning photography and describes his adventurous life in a gripping portrait of the ocean as a place of beauty and mystery, a place in trouble, and ultimately, a place of hope that will rebound with the proper attention and care.

"The renowned marine-life photojournalist shares behind-the-scenes stories of documenting elusive, bizarre, and increasingly endangered sea creatures, from the alienlike firely squid to the mammoth right whale."--Entertainment Weekly "Stunning whale and seal portraits and kaleidoscopic photos of tropical fish and coral..."--Boston Magazine "It's a stunning showcase of underwater images."--The Huffington Post "Skerry is one of those proverbial cases of a Jacques Cousteau-watching, National Geographic-reading child who dreams big and goes after it. He started shooting when photos came in little canisters of 36 frames and has been at it since."--NPR The Picture Show "Photojournalist Skerry presents some 150 images

of marine animals and ecosystems along with stories of his encounters with them. He hopes his work will increase awareness of the threats facing the oceans and inspire actions to counter these.

• Science Magazine "A gold mine for more casual ocean enthusiasts or budding marine explorers, as Skerry's photographs and accompanying text are at once fascinating, moving, and inspirational."

You can't get any closer without a scuba tank."--Juliet Eilperin; national environmental reporter and author of *Demon Fish: Travels Through the Hidden World of Sharks*

• "Ocean Soul reveals an important and unreachable realm few ever are able to see. I have spent my adult life behind a camera attempting to share nature's miracle in photographs. Brian Skerry has sought and captured imagery that I have not or ever will see. I am transfixed and at the same time humbled by the extraordinary moments he has given us in this new book."

• Jim Brandenburg; photographer, author & filmmaker

I don't often buy pretty underwater coffee table books - because I read them once and put them on the shelf. This one refuses to go to the shelf. The text is enjoyable reading and I now feel like I know Brian Skerry ... but the images evoke such emotion - from compassion, to wonder, to concern ... that I find myself picking up the book often ... and sneaking 15 minutes to visit Brian's photographs over and over. As an underwater photographer I appreciate his technical mastery, but most of all, I know he named the book correctly - Ocean Soul. The Aquarium of the Pacific in Long Beach, CA is hosting a Dec 2012 - March 2013 gallery showing of Brian's images and I hope to meet him and tell him how much I am enjoying this book, week after week.

Brian Skerry's photographs are so magnificent that it can be tempting to breeze through his narrative to get to the next picture of a whale, squid, or coral. But don't hurry past his words; Skerry is a fine writer who transports you to his underwater worlds and introduces you to the sentient and intelligent beings that survive sometimes harsh environments and the scarring effects of human activities. I bought this book for my mother-in-law, having been intrigued by a review. Then I spotted it in my library, so had the opportunity to read and view it myself. It is a treasure that I want for my personal library.

Gorgeous, gorgeous pictures, and fantastic stories of how he got the pictures.

Beautiful photography and story of Mr. Skerry's interest, love of the ocean and his career.

Skerry is the best ocean photographer out there and this book speaks for it!
