Structural Competency For Architects

Synopsis

Structural Competency for Architects is a comprehensive volume covering topics from structural systems and typologies to statics, strength of materials, and component design. The book includes everything you need to know about structures for the design of components, as well as the logic for design of structural patterns, and selection of structural typologies. Organized into six key modules, each chapter includes examples, problems, and labs along with an answer key available on our website, so that you learn the fundamentals. Structural Competency for Architects will also help you pass your registration examinations.

Book Information

Paperback: 338 pages

Publisher: Routledge; 1 edition (August 15, 2014)

Language: English

ISBN-10: 0415817889

ISBN-13: 978-0415817882

Product Dimensions: 8.5 x 0.7 x 10.7 inches

Shipping Weight: 2.1 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 1 customer review

Best Sellers Rank: #120,973 in Books (See Top 100 in Books) #31 in Books > Engineering & Transportation > Engineering > Reference > Architecture > Codes & Standards #45 in Books > Engineering & Transportation > Engineering > Reference > Architecture > Methods & Materials #63 in Books > Engineering & Transportation > Engineering > Civil & Environmental > Structural

Customer Reviews

'Architects learn structural calculations in school, but have little opportunity to practice those skills in daily work. Becker's book is the clearest text I have seen to help practicing architects remember "How do I do that?" Structural Competency for Architects offers step-by-step instructions to address all the common structural design tasks involved in typical buildings.' - Jeremy Fretts, Senior Project Architect, Niles Bolton Associates 'This is a comprehensive text that addresses every aspect of structural design in one volume [...] It is a welcome addition to the literature of structure in architecture.' - Deborah Oakley, Associate Professor, School of Architecture, University of Nevada

Hollie Hitchcock Becker is an Assistant Professor at The Catholic University of America in Washington, DC where she teaches Structures and Environmental Design. With a BSCE in

engineering and a Masters of Architecture, as well as a 30-year career in engineering, business and education, she understands the differences in learning styles between architects and engineers.

Great book but lots of typos. Maybe the next edition will have all that adjusted
