I chose this rating because, the book was a little short but it was very on topic. I liked that it had a topic everyone could relate to, Minecraft. I recommend this book to children in second and third grade, but first, fourth, and fifth graders might like a quick pace read.

This book was an excellent way to end the day before my brother and I went to bed he loved it so much that we read it in 2 days and 20 minutes a night I think it was also amazing we loved it so much that if you are checking the comments we think that you should read this book.

This is so good you can never see in minecraft. It can make the impossible possible. So you got to read this book because this is so cool.

I liked this book and I give it five stars even though it's short but after all it is only a legend and it was also very interesting

Yet another masterpiece made by Ender King . Meet Christine the creeper princess as she adventures the world and saves endermen .

This book is ok, but it is kind of weird. Its better than some books ive read, and thats a complement not an insult. Yes i would recommend this to people who like minecraft.

This book is awesome. It's very very adventurous. It's amazing for what the creeper can do in this story. I think you guys should read this amazing book.
