Frederic (Ric) H. Martini received his Ph.D. from Cornell University in comparative and functional anatomy for work on the pathophysiology of stress. He is currently an affiliated faculty member of the University of Hawaii at Manoa. Dr. Martini is a President Emeritus of the Human Anatomy and Physiology Society (HAPS) after serving as President-elect, President, and Past-president over 2004-2007. He was a member of the HAPS committee that established the course curriculum guidelines for A&P. He is the lead author of nine undergraduate texts on anatomy and physiology or anatomy, all published by Pearson. [Edwin F. Bartholomew](#) received his undergraduate degree from Bowling Green State University in Ohio and his M.S. from the University of Hawaii. Mr.

Bartholomew has taught anatomy and physiology and a wide variety of other science courses (from botany to zoology) at both the secondary and undergraduate levels at historic Lahainaluna High School, the oldest high school west of the Rockies, and Maui Community College. Mr. Bartholomew is a member of the Human Anatomy and Physiology Society (HAPS), the National Association of Biology Teachers, the National Science Teachers Association, the Hawaii Science Teachers Association, and the American Association for the Advancement of Science. Working with Dr. Martini, he has coauthored five undergraduate texts on anatomy and physiology, all published by Pearson.Ã Â

I used this book for a class at UCLA, and it was fantastic. The writing in most anatomy books is quite dry, but this one does a good job of tying anatomy and physiology together in a readable, layperson-friendly format. I especially loved the parts on EKGs and sodium ion pumps. Great diagrams and useful tables helped me study many a night, and I consider this my favorite A&P textbook of all (I've used 3 different texts, and am about to start Physician Assistant school using a 4th).Hard to believe I'm giving a textbook 5 stars...

Had to buy this book for an anatomy class. It's all about anatomy.

I waited to get my text to see if i would actually need a book because some professors don't even use them, and after seeing the price at the university book store i thought i would try to find it cheaper than \$200.00 for a book i would only use once. Renting this text made it cheaper and reduced my pile of books around the house because i can send it back. I received my textbook 3 days after ordering, so waiting to get it was no be deal because of the fast standard shipping!

BE CAREFUL!!! A \$24 rental exploded into over \$150 in charges! I was charged for an rental extension and the cost of a new book without approval!

There were highlighted pages and writing (to be expected) but the book did the job and I got it at a great price. I also really appreciated the handwritten note - it's the little things!

OMG! loved it! was in great condition and helped a lot!

Very in-depth with diagrams and pictures to follow through. Gives you a better understanding.

I love the idea of it being loose leaf form. Only need to carry the chapters that are being covered in class.
