Introduction To Reference Sources In The Health Sciences

Synopsis

Now, after almost a decade, a new edition of the standard guide to health science sources is available for students, librarians, and health professionals. Prepared under the auspices of the Medical Library Association, this completely updated and comprehensive fourth edition discusses the various kinds of bibliographic and information sources, their use in health sciences, and provides a comparative approach to major tools and their use. Individual chapters cover: organization of reference collections; bibliographic sources for monographs and periodicals; indexing and abstracting resources; U.S. government documents and technical reports; conferences, reviews, and translations; dictionaries, terminology, and thesauri; handbooks and manuals; drug information sources; consumer health, medical, and health statistics; directories and biographical sources; history sources; and grant sources. This new edition also emphasizes the growth of electronic resources and how they are used with print sources.

Book Information

Paperback: 389 pages

Publisher: Neal Schuman Pub; 4 Sub edition (January 2004)

Language: English

ISBN-10: 1555704816

ISBN-13: 978-1555704810

Product Dimensions: 1 x 6.2 x 9 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)
