## Customer Reviews

Author Miles Anderson is a collector of cacti and succulent plants. He owns and runs the Miles' to Go cacti and succulent nursery in Arizona, USA. Miles has contributed to a number of articles and books. Consultant Terry Hewitt grows cacti and succulents commercially, and has contributed to articles and books.

Very informative book and a very good reference, especially for the beginning grower. Beautiful photographs ... they make me want to live in the desert so I can have cacti and succulents as part of my natural habitat!

I am in the phase of reading the book and learn about cactus. Y like the book in my humble opinions is great

nice book will work well

If you or someone you care about likes great photos accompanying good text on how to care for - and grow - these three dimensional living beauties: This fabulously illustrated, easy to carry, book just might be a very nice gift idea - for any occasion.

This book is my first concerning Succulents, which I am growing for my leopard gecko's terrarium, and I would say it is an excellent starting point for learning about this type of gardening. I enjoy the fact that it illustrates and describes a large variety of succulents and therefore provides ideas about potential setups and new plants to obtain. I learned about proper substrate setup as well and various problems that could harm my plat as well; however the one thing I wanted to see expanded information is proper indoor lighting setups and requirements.

I really enjoy cactus and succulents. I like the way they look and feel. I have a ton of them in my front window. This books has great info on the types and care of various plants. I'm glad I added it to my collection.

This is a smaller book , a quality paperback, with excellent photos for plant ID and handy front and back covers that act as bookmarks. A nice little surprise of a book.

This book helped me identify plants others struggled with. I highly recommend it.
