Writing In The Sciences: Exploring Conventions Of Scientific Discourse (Part Of The Allyn & Bacon Series In Technical Communication) (3rd Edition)

Synopsis

A rhetorical, multi-disciplinary guide, *Writing in the Sciences* discusses the major genres of science writing including research reports, grant proposals, conference presentations, and a variety of forms of public communication. Multiple samples from real research cases illustrate a range of scientific disciplines and audiences for scientific research along with the corresponding differences in focus, arrangement, style, and other rhetorical dimensions. Comparisons among disciplines provide the opportunity for students to identify common conventions in science and investigate variation across fields.

Steven B. Katz is an associate professor of English at North Carolina State University. --This text refers to an out of print or unavailable edition of this title.

Nice, quick to ship

I wouldn't just buy this book for the heck of it, but it's not a horrible book. For the most part, it's easy to read and comprehend. A few of the case studies are very jargon specific to that field of study which can make it hard to understand. I found myself using google search a lot while reading the case studies.

Not very helpful. More examples would be useful. Not very clear on CSE rules. I found myself looking online more than in this book.

This book was helpful for my MA in Technical Communication. This was a required read. There were a lot of useful updated examples in the book.

This book has changed my reading and writing forever. I'm not giving it up to anyone because I plan to use it for the rest of my life

Received the book and the pages are falling out

good

Great book
