## Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and

explore their world.

It is a small token for the authors of this map to mark the Persian Gulf by its correct name. But, to write sentences on a map regarding the claims of a bunch of brutal Arab dictatorships that line the Persian Gulf proclaiming the islands that were a part of Iran before they were even a country as their territory is shameful act by the authors, to say the least.
