Customer Reviews

How did the universe begin? How hot is the sun? How long does it take to get to the moon? Find out the answers to these questions and more in Magic Tree House Research Guide: Space, Jack and Annie's very own guide to the secrets of the universe. Including information on stars, planets, space travel, life on other planets, and much more!

WILL OSBORNE and MARY POPE OSBORNE have been married for a number of years and live in northwestern Connecticut with their three dogs, Joey, Mr. Bezo, and Little Bear. Mary is the author of over one hundred books for children, including novels, picture books, biographies, and retellings of fairy tales and world mythologies. Will has worked for many years in the theater as an actor, director, and playwright. Together he and Mary have coauthored two books of Greek mythology and eight Magic Tree House® Fact Trackers. Will has also written a multimedia planetarium show, Magic Tree House Space Mission, and is cocreator with Randy Courts of Magic Tree House: The Musical, a full-scale Broadway-style family musical based on Christmas in Camelot. SAL MURDOCCA has illustrated more than 200 children's trade and text books. He is also a librettist for children's opera, a video artist, an avid runner, hiker, and bicyclist, and a teacher of children's illustration at the Parsons School of Design. Sal lives and works in New York with his wife, Nancy.

We love all the research guides for MTH. They are written at a higher Lexile level than the stories but it makes them fun to read together. My 6 year old doesn't have the patience to read through a research guide the entire way through on her own but together it makes for a fun project...she gets to tell me about what happened in the story to Jack & Annie and together we learn some fun facts about whatever time/place the story was about.

My eight year old grandson really likes these books. They are well written and profusely illustrated. Perfect to encourage the beginning reader. My grandson seems to like the research guides even more than the Magic Tree House 'story' books.

The kids really like the animations and presentations of this book. While it is definitely not boring, the planets themselves get only one page each of factual info in super small text. The solar system overview chapter was great for group reading and was primarily what I used from the book,

including a photo of a meteorite in comparison to the size of children. Translation: great as a fun addition to learning but not to replace hard fact texts and in-depth lesson plans.----You don't need to read the accompanying Magic Tree House fiction book in order to use this research guide.

This was a gift. The recipient like it.

My Magic Treehouse fan is really enjoying this non-fiction addendum.

It seemed to be a hit with my grandson, but when he doesn't talk about a book, I guess I wonder if he is just being polite.

good way to get your kid interested in science

We love how educational these books are.
