Elizabeth lives in Michigan with her husband,

Richard.

Bought this to be a filler when teaching. Works for lots of different ages and has a lot of great information. Also it is a really good group activity if you have small groups of students choose the next action. Everyone wants to survive, so it is very engaging.

This is a great addition to our school library. It was just as described and arrived very quickly. Thank You for your outstanding service.

I was pleased to find this great book on . My 2nd grader read a similar story at school and loved the interactive nature of the book as well as the factual and historical nature of it. The book tells a fictional story but includes real life events. The reader chooses the path they want the story to follow by answering questions and turning to a given page, as directed in the book (i.e. "If you choose to stay and help, turn to page 19. If you choose to flee, turn to page 23.") Very cool books with several different endings that you can go back and read by making different choices.

Choose your own way the story progresses in so much fun --- my grandsons like this book!

This is a great method to use in teaching a homeschooler, or for that matter a public schooled student. It wouldn't hurt for a teacher to be a bit more interactive, I'd separate the students in to groups, each choosing among themselves the choices, and give each group a chance to change to other choices, they won't forget it and will have fun with it.

Very realistic, my 8 year old boy was electrocuted getting out of a car when hurricane waters plowed the car he was riding in into a power pole. A little graphic but my little country boy loves it!!!! We read these together

My almost 9 year old son could not have been MORE thrilled when he opened this for Christmas! He loves the "You Choose" series and had no idea there was this option - he has read it several times, making wrong choices here and starting over and making a good choice there... it's super educational and teaches emergency safety in storm situations which is always helpful, but and it teaches things about the storms themselves, and is so fun and entertaining. A GREAT book and series for kids who need a little "kick" to get reading more!

My daughter is at that age where she is WANTING to read new things, and on her own. These books were not too difficult for her to read (some help was needed from time to time) and she loves that she gets to choose what happens next. The tips that they also give in different situation was beneficial for not just her but me as well. These are a great idea for children.
