## Customer Reviews

Janice Busco has 20 yearsA- experience with Western native plants as an environmental horticulturist, consultant, and educator. She has served as co-director of the Theodore Payne Foundation for Wildflowers and Native Plants in Sun Valley, California, and as horticulturist at The Arboretum at Flagstaff. Rob Proctor is a prolific author, illustrator, photographer, and lecturer -- as well as a columnist for the Denver Post and an instructor at the Denver Botanic Gardens. He lives in Denver, Colorado. Charles Mann's award-winning photos have been featured in many magazines, including Sports Illustrated. Stormy May is a graduate of the Hollywood Film Institute and is a professional equine video producer.

Hi, I'm Jan Busco, one of the authors. This book distills my thirty years knowledge of gardening in this region and is one of the best there is. I love it because I wrote it with my head and with my heart, and I present it to everyone as as a unique and simple book that will tell you how to get what

YOU would like out of your garden. Most Southwestern gardening books you will find are simply all about desert gardening. This one gives you all the information you will need to garden anywhere in the southwest -- from the high elevations of Taos to the low deserts of Yuma, Arizona and in-between in the dry foothills and plains of Colorado. Buy it, you will use it and share what you learn with your friends. I co-wrote this book with famous western garden writer Rob Proctor. Rob provided the introductory section on general principles, garden design and planning -- and as always his writing and pictures are fabulous, a little funny, and very easy to follow. I wrote the second half, which is all about getting started in gardening anywhere in the entire Southwest, with an emphasis on how to make it easy and fun, and how to use native and drought-tolerant plants and edibles for a low-water use, sustainable, eco-friendly southwestern garden. This book is inexpensive and easy to follow. It is filled with fantastic color photos, and lists of plants you can use to attract butterflies, hummingbirds and bees to your garden. It is all about making a garden paradise that is your own rather than a cookie-cutter lifeless landscape. And it features some of the best plants there are -- plus teaches you how to find other plants that will give you just what you love and need in your garden.
