Age Range: 5 - 10 years

Grade Level: Kindergarten - 5

Customer Reviews

JULIA FINLEY MOSCA is a copywriter and former journalist who spent more than a decade in Hollywood crafting messages for money. After working with such recognizable brands as Entertainment Tonight, Yahoo!, American Greetings, and JibJab, she landed her most rewarding job yet: mom to one ferociously curious and spunky little girl. The Amazing Scientists series marks Mosca's debut into the magical world of children's books. DANIEL RIELEY is a British freelance illustrator based in Lisbon. After studying at The Arts Institute Bournemouth, taking an epic backpacking adventure in Australia, and working 3 years in London, he decided to take off to sunny Portugal. For the last 2 years, Daniel has been working on several illustration projects in advertising, print, card design, and children's picture books. When Daniel is not drawing you can probably find him trying to catch waves, taking photos with old cameras, or playing his newly discovered sport Padel.

I ordered both "The Girl Who Thought in Pictures" and "The Doctor with an Eye for Eyes" for my 3 and 5 year old children. The books arrived last week and became instant favorites, especially with my 5 year-old daughter. I have read them every night since. The biographies strike a difficult balance between being engaging and being factually accurate and appropriately complex. Each story is written in rhyme with and beautifully illustrated. Neither the stories nor the illustrations are simplistic, however. They are detailed and complex making them appropriate and appealing to a wide range of children. In addition, each story ends with a letter from the star of the biography, interesting details from the author's interviews, a timeline and a two-page prose biography. These extras really enhance the books and feed children's curiosity for more information. My daughter loves looking at the photographs, and hearing more about these women's incredible lives. I appreciate the gap in children's literature these books fill. They are about incredible women who have had a massive impact in the sciences though they faced monumental hurdles. The stories are honest, appropriate, and not watered down. They have led to very meaningful conversations with my daughter about injustice in the world, as well as resilience and perseverance. I will be purchasing more for my school! Highly recommend.

My 3.5 year old loved this book! It is one of our new favorite books to read together. The rhythm of the words kept his interest and I enjoyed the topic. Both children and adults will learn something new from this book. The story sends such a positive message to both young and old. The illustrations are amazing and so creative! They really help tell the story of Dr. Patricia Bath. I can't wait to read the next book in this series. It is such a unique book that can really be enjoyed by all ages. Hope there are many more to come from this author.

I really enjoy this series of books. It's a refreshing change to introduce real life stories of positive female role models. This book will hold up for many years of my kids reading levels as it has a very informative and more detailed timeline of her journey of breaking down barriers and succeeding as an influential doctor. The illustrations are very interesting for my kids to stop and look at as they hear the story. I applaud and love the normalizing the every day female heroes making breakthroughs in society.

This book is brilliantly written! I love reading a book to my 4 year old daughter that gives her a real person she can look up to. It's so important to me, especially being the mother to 2 daughters that

she learns that she can accomplish anything that she sets her mind to do, no matter what the obstacles are or what people tell her. The illustrations are so fun and the way the book reads and the rhyming patterns of how it is written, keeps my daughter engaged while I'm reading. I can't wait to follow this series and see what amazing woman the author writes about next!

What a great book to get young girls interested in science! My own children loved it and I can't wait to read it to my class of 1st graders!

Three E's! Engaging, entertaining, and educational. Love it!

A wonderful story and lesson.....

My son and I really enjoyed this book. I had not heard of Dr. Bath before reading it, and I loved how the Seuss-esque rhymes appealed to my son, while I enjoyed the further in depth information and timeline at the end of the book. The illustrations were fun as well. I'm looking forward to more in the series!
