Mentoring, as my good friend Howard and his son Bill suggest, is one of the most powerful yet under-utilized disciplines for men today. My life would not have taken the course it did without the input of a few key men along the way. This is an excellent book on mentoring and the importance of having a more mature Christian speak into your life! Well done!

As Iron Sharpens Iron is an extremely practical and insightful book covering all aspects of mentoring relationships. Part One takes a close look at these from the perspective of a man (really, of anyone) seeking a mentoring relationship. Part Two flips things around to look from the mentor's perspective - why mentor, what to look for in a protege, how to help the your mentoring partner set a learning agenda, and more. There is also a helpful appendix on how to establish a mentoring program in your church. The principles within apply well both in formal mentoring contexts as well as informal. Both have advantages, but the authors make a strong case for informal mentoring relationships and taking things slow (especially for men). Here are some of the highlights I found within the book:\*

- Established the benefits of mentoring relationships for all, including peer mentoring\*
- Very practical and realistic advice on initiating mentoring relationships (one of the most common stumbling blocks)
- including a nice list of 20 ideas for starting such a relationship\*
- Clear focus that mentoring is about

relationships, with intentionality for growth\* The ten marks of a mentor - as well as the profile of a protege\* A very useful guide in the appendix for personal or group use, to walk a person or pair through the book and apply it\* Overall, an approach that seems like it would work well with modern (and postmodern) audiences of all ages One of my favorite tips in the book was that when talking to someone about initiating a mentoring relationship, don't use the word mentor or mentoring!?! It tends to scare many people off unnecessarily. In talking to several men, both younger and older, I've found this to be quite true. Likewise, if you're looking to start a mentoring program, they suggested that you don't actually make it a "program", and that you don't have to refer to it as "mentoring". I've read many books and articles on mentoring in the past few months. I now wish I started with this book - it pulls together many best practices and great ideas that I've seen scattered across many other sources. The target audience for the book is definitely men, and leaders of men's ministry. Yet the principles and practices taught definitely seem applicable to any audience.

As always, Dr. Hendricks comes through again with timely advice for being a mentor and friend to other men. I have profited much from his writings and this one deserves to be read and re-read.

I have yet to be disappointed with anything written by Howard Hendricks. In this book, he does a superb job of presenting the tremendous worth and transforming power of a mentoring relationship between two men. While these principles would also apply to a woman-to-woman relationship, Hendricks is writing to provide support for the Christian men's movement "Promise Keepers." There are two sections to this work: how to find a mentor, and how to be a mentor. Hendricks emphasizes there are many more men seeking mentors than there are men who are willing to be mentors. He discourages actually using the title of "mentor" when establishing such a supportive relationship, for fear it will intimate one of the parties. Instead, he promotes referring to the interaction as what would occur between two friends. Hendricks also describes how to spot a mentor or a protégé, then how to avoid common pitfalls of such an arrangement. For anyone seeking to learn from a respected male friend, or for someone seeking to invest his life-lessons of experience in a younger man, this book is simply invaluable.

Good instruction for mentoring!

This book has inspired me to grow and help my fellow brothers to grow.

#ONAMISSION!!! Recommended for all to read. Thanks for such a great book and insight.

nice one

I reviewed some 11 books on mentoring this past summer, and this one written by Prof towards the end of the Promise Keepers movement is still the best out there. Mentoring still is a scarce commodity in our culture, and getting it started is still difficult and not much has hanged in close to 20 years. This book is for both mentors and mentees (proteges).
