Practical Aviation Security, Second Edition: Predicting And Preventing Future Threats (Butterworth-Heinemann Homeland Security)

Synopsis

The second edition of Practical Aviation Security is a complete guide to the aviation security system, from crucial historical events to the policies, policymakers, and major terrorist and criminal acts that have shaped the procedures in use today. The tip-of-the-spear technologies that are shaping the future are also addressed. This text equips readers in airport security or other aviation management roles with the knowledge to implement the effective security programs, to meet international guidelines, and to responsibly protect facilities or organizations of any size. Using case studies and practical security measures now in use at airports worldwide, readers learn the effective methods and the fundamental principles involved in designing and implementing a security system. The aviation security system is comprehensive and requires continual focus and attention to stay a step ahead of the next attack. Practical Aviation Security, Second Edition helps prepare practitioners to enter the industry, and helps seasoned professionals prepare for new threats and prevent new tragedies. Covers commercial airport security, general aviation and cargo operations, threats, and threat detection and response systems, as well as international security issues. Lays out the security fundamentals that can ensure the future of global travel and commerce. Applies real-world aviation experience to the task of anticipating and deflecting threats.

Customer Reviews

"... the depth of research and application delivered by the authors is evident... This book should be

required reading for all those involved in the protection of airports, airlines, aircraft, and "above all" "passengers." -Security Management, Nov 2014

Jeffrey C. Price, MA, CM, ACE-Security, is a recognized authority on aviation security. He is a Professor in the Aviation and Aerospace Science Department at Metropolitan State College of Denver. He has worked in the field for over 20 years, most recently as a trainer for the certification programs of the American Association of Airport Executives (AAAE). His company, Leading Edge Strategies, has conducted the Airport Security Coordinator Training School. Jeff is also the original author of the Airport Certified Employee (ACE) Security program, as well as the lead author of the new Certified Member (CM) Body of Knowledge, and trains both the ACE Security and CM programs. Jeff entered airport management in the Operations Department at Stapleton International Airport in 1992, worked in operations and developed the initial airfield manager training programs for DIA, then helped open Denver International Airport in 1995. He served as the Assistant Security Director until 1998, then moved to Jefferson County Airport as the Director of Public Relations, Marketing and Property Management. He was appointed the Airport Manager at Jefferson County Airport in 1999 and served until 2002. He also was appointed to a term on the Colorado Aeronautics Board.

Excellent in depth book, gets dry at times though...but then again it is a textbook... If you are in any way interested in aviation or a degree in the field I highly recommend reading this book for a deeper understanding of TSA and 9/11. I took the class taught by the author and was amazed at how much I learned.

Understanding why and how the idea of "aviation security" cover what I need to learn this.

Supervisors were very happy with the product. The delivery was right on time!!!

Great condition.

Needed for class

item as described

Informative book

Bought this for a class but i didnt need it... I was taking security and i decided to rent it but we didnt open the books once and i wish i would have waitedThe ereader version is great if you have a device so you dont have to carry it around campus
