Loved this book ... Wiley Pathways Emergency Planning ... with the way that Universities are moving to E-tablets.. I used this book for my Criminal Justice - Emergency Planning class and was able to access pages, chapters, index, and the glossary instantly where other classmates struggled to find fast access pages, chapters, index, and the glossary instantly on the E-tablet book. I got an "A" for the class and others received "B" and below. Thank you. I always try to use the Hard or soft cover books now for my University courses.

Another book for a college class and overall its not a bad book, its fairly inclusive but a little on detail. If you are new to emergency management or emergency response then this book is probably just about right for you. If you have a couple years of experience under your belt then there is not enough detail about the higher level concepts of emergency management/response to get you to that next level of knowledge. In other words a good intro book but the problem that I have is its being used for a 400 level class.

The Kindle version is only available on Kindle for PC. Furthermore, it keeps shutting down the program while trying to navigate the text. I do not have this problem with the other almost 500 books on my Kindle for PC or other Kindle devices. It is very frustrating; I am in the first week of my Emergency Planning class. I would postpone the class if I could, but it is too late for me to do that.

I really did not use this book too much and I will be re-selling soon. If you go to GCU, you will only need to use these books for a couple of assignments. I also bought this book used and it was very

beat up for the price that sold it for. A little too expensive for a used book.

From college kid's perspective a great book and all around great transaction.

I rented this book for an emergency planning class for a comprehensive price. After all, It was a bargain since I could save more than half price. I'd advise colleague students to make good choices to save money. Thanks a lot!

Great price, fast delivery.
