Best Sellers Rank: #86,262 in Books (See Top 100 in Books) #25 in [Books > Cookbooks, Food & Wine > Main Courses & Side Dishes > Casseroles](#) #178 in [Books > Cookbooks, Food & Wine > Cooking Methods > Slow Cooking](#) #463 in [Books > Cookbooks, Food & Wine > Kitchen Appliances](#)

## Customer Reviews

This cookbook (3 Books in 1) is a wonderful cookbook. I have already made several of the recipes and they were great. Finally, I have a cookbook that calls for ingredients that I have in my kitchen; unlike most other books I've ordered. I am NOT a chef and do not have a kitchen full of spices and items I've never heard of before; I just wanted a simple basic down home book of easy recipes and this one is it. I would highly recommend this cookbook if you want simplicity in cooking and ingredients used.

This book is full of easy and quick recipes, with most of them utilizing staples already on hand. Almost everything is made with some kind of Campbell's soup, which provides more flavor and the right amount of moisture for proper cooking. This was a lucky find for me. I go to this cookbook more often than any other on my shelf. It's great for busy people.

I bought this cook book as a gift for a friend of mine who doesn't really know what to cook. He also mentioned if he had a cookbook, it would help him to know & figure out what to buy at the store. So, I went a head & ordered these cook books for him as I told him when I first started cooking this is what I went off of, because they were quick easy recipes & not a lot of prep time or cooking time.

These books are such a great way to get your feet off the ground for cooking. Very easy for young adults too. I highly recommend this.

This one is another excellent choice for people lean on time or money or both. Campbell's soups are a main staple in so many traditional recipes and newbies often miss their versatility. This books clues them in on how to add the "secret ingredient" and keep the flavor popping. Highly recommended for the bachelor/college/everyday kitchen!

I love Campbell Soup so don't miss read the title of this review. I own Campbell M'm! M'm! Homemade in Minutes, Celebrations and Classic Recipes cook books. I got these 3 cook books from a lady when I worked at a supermarket that hated me eating TV Dinners. Being a single guy I couldn't cook or thought it was too hard. However these cook books taught me how to cook good meals simple and easy. Campbell Soups also have the recipes on their site and with the books I learn how to cook. I mainly brought this book for the slow cooker selection. The first two parts basically have all the recipes my other Campbell Soup books have. The only thing new is the slow cooker selection. If you own any other Campbell Soup cookbook you may want to pass on this one as you may already have the recipes. You can also go to their site and search for a recipe and print it out. If you are new then this is a easy and simple book to teach you how to cook. The slow cooker selection has some good ideas.

I am not a very good cook, so I like shortcuts in my cooking. When I saw this book and its good ratings, I thought I'd give it a try ... especially the 4 ingredients or less section. So far, I am not overly thrilled with the dishes I have made. They are okay, but nothing great. For example, the Shortcut Stroganoff came out satisfactory, but my family prefers my usual "recipe" (Betty Crocker's Hamburger Helper using lean ground beef). Something that looked really tasty in the book photo and extremely easy to make were the Cheddar & Roasted Garlic Biscuits, the type that are served at a popular seafood restaurant chain. I tried to purchase the key ingredient, Swanson Seasoned Chicken Broth with Roasted Garlic, only to find out that the product had been discontinued. (Although I just purchased the book, it was published in 2007.) I, too, was hoping I would be able to give the book a 4 or 5 star rating, but the recipes fell short in my opinion.

A lot of these recipes aren't really recipes (especially the 4-ingredient section), but that's not a bad thing. More like ideas, for those of us who are not creative enough to think of these things on our

own. Simple stuff like "Put this soup over chicken" or "Mix this soup with mashed potatoes". Kind of a semi-homemade vibe. Anyone looking for anything more is going to be disappointed. I am a newlywed who is just learning to cook and needs quick and easy dinners that I can make after work. And now that Campbell's offers a lot of low-fat and low-sodium varieties, you can substitute ingredients to make the recipes more healthy. The book itself is bigger and more substantial than I thought it would be. I feel like it's definitely a good value for the price. And as a very picky eater, I can see myself liking about 90% of these recipes. I'm going to hide this cookbook so that my husband thinks that I made it all from scratch!

I previewed this cookbook before I ordered it. The fact that the recipes took only a few minutes to prepare and used basic items that I always have in my pantry caught my attention right away. The first recipe that I tried was delicious and I knew I had a winner.
