Flying Small Helicopters (Collected Rotary Flight Test Articles, 2004 - 2011)

Synopsis

This is a collection of flying instructor Helen Krasner's flight test articles, which were originally published in 'Today's Pilot' and some other aviation magazines. The first in a proposed series of four books, this one looks at the smaller helicopters on which most people learn to fly, such as the Robinson R22, R44, Schweizer 300CBI, and Bell 206 JetRanger. Each helicopter is described in detail, with an account of Helen's personal experiences of what it is like to fly it for the first time. It is thus much more than a theoretical textbook account. There is also a section on the history of each type, and detailed specifications. Where possible, a photo of each helicopter is included. This book is aimed at anyone interested in helicopter flying, whether they already fly helicopters, hope to in the future, fly models, or simply find rotary aircraft fascinating. It would also make an excellent gift for any rotary enthusiast. It contains a great deal of detail, and is over 27,000 words in length. Future books will cover flying 'Popular Helicopters', 'Historic Helicopters' and 'More Unusual Helicopters'.
