Enjoyed reading more about Dean and his rise in his career. Chavez and Tallgrass feel like old friends and are great additions to the new platoon. Hope the next book gives more detail on Chauncy, who clearly is in need of help and quite a sad person. Good storyline, and the reader quickly feels familiar with the characters. Great job.

The Wolf series (Books 1&2) were my first exposure to this author and I was thoroughly pleased... Pleased with the telling of the story as well as the character development and superior editing. The author has set the bar high for others and that's a very good thing! I can't wait to read the next book in the series!!

I was skeptical at first but as I read more i was soon hooked. I read as Dean Blaze grew into a full blown Hero! All throughout his journey he kept humble and human. Even when the easy way presented itself he would not take it he just thought he's way through it and inspired those around him to be better. I'm in awe of Toby's writing style and will be checking out his other books. You ROCK!

The book picked up where the first one left off. The action was fast paced and coherent. Can't wait for the next book.

This what military science fiction is supposed to be. Plenty of action, great storyline. The first book was pretty good, and the follow up didn't disappoint. Ready for the next book!

Liked the basic story and characters even the bad guys and idiots. Did not find the rank structure realistic or practical . Admirals no not command ships. Recon should have probably been naval ranks like SEALs. Heavy trips given the technology used were a bit unbelievable ... could easily have been built to function facing forward and been more maneuverable. One cannot really move backwards in many if the circumstances where they had to. But overall did not detract much from the story.

4 1/2 stars I give. It is good story, I will buy the next book so you'd better have it ready. Negative

point: please no romance at all just want killing and maiming all..

The stories keeps getting better! A group of special people that go out and defend the world against the unknown! And along with their weapons they bring their humanity.
