Being prepared is always the absolute right choice and this book should be in every household, as for me. You never know when the next emergency or calamity is going to occur. And I prefer to be prepared to everything. Sure, it is better if it will never happen but if I will be ready for this than it will happen and I will not be ready. This book prepares us for survival, but also it offers great and simple strategies for sustaining once that disaster strikes. Some of the best points cover how to store ample food, water, and a variety of perishables. The second book about household hacks is also really worth of reading and I started to use some of hacks in my house. So was this bookset helpful for me? 100% yes, it was. Highly recommended to everyone

I got a lot of useful information from the 1st book in this book set about preppers and household hacks. It teaches you everything you will need to know about being prepared and how to go about, as we all know it is much better to be prepared for a disaster than having one and not being. I liked

the first aid tips within this book, it's always useful to have a first aid kit ready. Both books offer practical advice on different areas and are simple to understand, they are well and one I would recommend to get.

I like this kind of books. This set covers the most widespread issues. I appreciate these books for practical and simple tips, interesting ideas and useful information. They are real life-simplifiers as they save money, time and effort. They teach how to make your everyday life more comfortable and explain how to act in unexpected situations. I consider this knowledge really necessary. So I'm waiting for new editions.

Preparation is better than suffering for the consequences of you not being aware of what is happening around you. I found this book very informative and giving advice for what the future might bring. Being prepared is not harmful but thinking ahead and being ready since nature and governments are unpredictable. Reading this book you will get a lot to prepare and think of things to do before it happens and also I appreciate a lot it has a do it yourself household hacks that is very helpful organizing our homes.

I was once hesitant when I saw the book's Title but I am also interested in first aid and survival tips especially that I am doing a training to be a volunteer in rescue operations in our community. I know almost all the basic necessity and things to be done during those hard times but the simplest way and simple details for survival is also in this book which make me more inspired to read more.
