Richard M. Perloff, Professor of Communication at Cleveland State University, has been on the faculty at Cleveland State since 1979. He has written scholarly textbooks on persuasion, political communication, and the communication of AIDS prevention. Dr. Perloff is a nationally-known expert on the third-person effect, the divergent perceptions of mass media impact on others and the self. From 2003 to 2011, he served as chair and the first director of the School of Communication at Cleveland State. Perloff enjoys teaching undergraduate persuasion, graduate persuasion, and political communication courses at Cleveland State. He is a Fellow of the Midwest Association for Public Opinion Research, writes feature stories for Cleveland weekly newspapers, and has received city and state-wide journalism awards for his work. He lives in Beachwood, Ohio with his family, is an early morning swimmer, and newspaper-with- coffee aficionado.

By far, one of my favorite college textbooks that I have ever had the pleasure of reading. The examples in the book were engaging and interesting, and each chapter created further interest. A great read, and I'm glad I got to be exposed to it.

Provides insight into the everyday persuasive processes we all live. Well organized chapters maintain attention and provide sequential information. A+++

I have used this book and its previous edition in a graduate-level course in strategic communications. It has been a perennial favorite with my students and I have heard from several who I advise for their theses projects that they refer back to it to refresh their memories on relevant theories of persuasion. I have yet to see a text that covers such a range of theories and that presents them (and their critiques) in such a comprehensive way. An appropriate text for upper-level undergrad or grad courses.

Great text, fast shipping.

It's a book for college if you need it this price is the best.

school

The book was in great condition, and rental process is easy to use and saved me a ton of money on textbooks. The book itself is interesting and easy to follow, much more so than our class lectures.

Great book!
