Cancer Research Secrets: Therapies Which Work And Those Which Don't

Synopsis

A comprehensive report on a wide range of cancer alternative treatments that have been shown to work. These are not always alternatives to orthodox treatments but can run in parallel. The author is an internationally-known MD with knowledge and experience of a wide range of holistic therapies.

Book Information

Paperback: 300 pages

Publisher: Mother Whale, Inc; 1 edition (June 1, 2011)

Language: English

ISBN-10: 0983878404

ISBN-13: 978-0983878407

Product Dimensions: 8.5 x 0.7 x 11 inches

Customer Reviews

Qualified in medicine MB ChB (same as MD) in Manchester, UK in 1970, Scott-Mumby almost immediately began research into controversial alternatives. He started the first successful Food and Environmental Allergy Clinic in 1979 which rapidly spread to Harley St (London), Glasgow, Dublin and Stockholm. Those were exciting days in which we made many new discoveries. Scott-Mumby made medico-legal history in 1986, when a UK Crown Court accepted his evidence that food allergy was capable of making a youth murderously violent; the story rated 20 minutes of Channel Four News and the youth was given a conditional release (condition: that he stick to Scott-Mumby's diet!). By 1990 the press were calling him "Britain's Number One Allergy Detective". Scott-Mumby has published several books in this field and been interviewed by the BBC and TV and radio stations worldwide, as a recognized expert in alternative health paradigms. More recently, he has gone into other areas and started to search for answers as to why an individual gets allergies in the first place. The answers have led him into homotoxicology ("complex homeopathy") and electro-dermal screening, using computers, and the Chinese model, allied to a Western technological database. Prof. Scott-Mumby now writes and lectures internationally on the themes of energetic medicine and the new anti-ageing

science, which is his current forte. He wrote the book VIRTUAL MEDICINE to bring science and validation to this emerging field and the vast technology it has spawned. In 2005, he was appointed professor of energy medicine at the Capital University of Integrative Medicine (now demised) and professor of nutrition at the Open International University for Complementary Medicines, USA. He is also on the Senate of the latter. His recent major book DIET WISE is the summation of 30 years advanced clinical work. PROFESSIONAL STATUS Founding member of the British Society for Clinical Ecology (now the British Society for Nutrition, Allergy and Environmental Medicine) Medical Advisor to the board What Doctors Don't Tell You (journal) Scientific and medical advisor to the British Society for Homotoxicology Certified chelation member of American College for the Advancement of Medicine Professor of Nutrition and Vice-Chancellor at the Open International University for Complementary Medicines, also Senate Professor of Energy Medicine at the former Capital University of Integrative Medicine

The book had a lot of new alternative cancer treatment ideas. I found it very helpful.

Nice summary of all the things to help one heal that can not be shared by medical doctors who would loose their license if they did not support the drug industry.

Excellent info!

Good read.

Very good information - - glad I purchased it!

It is scientific book

Good therapies

This book is far superior to most other books I have read on this subject. The author really understands what causes this health problem and what needs to be done to correct it. Many other authors are just out to sell books and promote their idea that may work for some people but not the vast majority. Dr Mumby's three pillars of therapy are 1 Diet, 2 Emotional clearing, and 3 Chemical detox. This is in contrast to some of the other books that emphasize one of the first two and hardly

even mention the chemicals. Dr Mumby mentions the Essiac and Hoxey herbal and a lot of other approaches that have been effective in his practice. He also discusses the dental connection in a comprehensive manner. He even has a section on therapies to avoid that I think is very accurate. This book will steer you away from misguided and over simplistic magic bullet approaches and help to orient you to the therapies you should research and investigate. Shortcomings of the book are in a lack of nitty gritty details.

DETOX The easiest way for most people to detox is take a coffee enema every day Dr Mumby doesn't go into enough details about the details of coffee enemas. It's the loose stools it causes that is most important. That's why drinking the coffee doesn't work. Dr Mumby doesn't emphasize the petroleum solvents one breathes in from riding in a car for an hour. It can take an hour in the infrared sauna to get these toxins out. Moth balls are another huge source of petroleum solvents. So Mumby gets points for saying do a detox of chemicals but he doesn't give enough details for the average person to realize what their major source of chemical toxins might be.

DENTAL Dr Mumby mentions dissimilar metals creating galvanic fields/currents that cause out gassing of mercury vapor. But fails to mention that most conventional dentists put silver amalgam bases under gold crowns creating the dissimilar metals problem. Many people with gold crowns would read this chapter and think they were safe from dental being a problem for them. In fact they have more of a problem with mercury toxicity than people with an equal number of silver amalgam fillings.

HYDRAZINE Dr Mumby warns against Hydrazine sulfate but fails to mention why it should not be used. If there is any alcohol in the diet or if the bowel bacteria are producing alcohol from the fruits, sugars and carbohydrates in the diet there will be a deadly synergistic reaction with Hydrazine sulfate.. So if on Hydrazine sulfate you cannot use fermented dairy products, fermented vegetables, no vinegar, herbal tinctures or homeopathic tinctures because they all contain enough alcohol to react with the hydrazine and damage the liver. Read Dr Gold's original recommendations on hydrazine. Without this information Dr Mumby's stance against Hydrazine sulfate is an opinion that may not be taken seriously by the patient who reads about it on the internet.

SODIUM BICARBONATE Then Dr Mumby warns against sodium bicarbonate. but he fails to mention the best reason not to use it. Dr Mumby is correct that oral sodium bicarbonate is not effective for most people. You have to have an acid blood pH indicated by fast respiration rate and short breath hold time. If you have low blood pressure which indicates a deficiency of sodium then oral sodium bicarbonate in small doses several times a day can help to balance the pH. Less than 15% of the population meets this criteria. If high blood pressure or on meds for it then potassium bicarbonate () is a better alkalizing compound Dr Simoncini injected the bicarbonate directly where it was needed which is a totally different effect than oral bicarbonate ingestion and not at all comparable.. Then

there is the problem of using sodium or potassium bicarbonate with Vitamin D3. Its use with high dose Vitamin D 3 is very dangerous because it causes calcium to come out of solution and be deposited in the soft tissues, joints and blood vessels. You have to take vitamin K2 complex if more than 1000mg D3 is taken or its is dangerous (see mercola.com). Since Vitamin D3 is a popular supplement many people are taking it and getting into serious trouble in as little as 5 weeks. Details details. ALLERGIES Dr Mumby mentions allergies as a major factor in cancer. His book is the only one I have found that mentions this major problem with regards to cancer and he is correct it is a major problem. Other authors are pushing exotic fruits and micro algae that are very allergenic with no mention of how to determine if you are allergic to these super foods. The cancer industry for the most part is into selling drugs and the health industry is selling supplements. Dr Mumby is into getting people to eat what agrees with their body.. Doing so will cause the pH to balance out naturally. Dr Mumby has also written a book on electro dermal Screening. But in my experience only one of the nine practitioners with one of these machines was able to help me. Its the skill of the doctor not the machine that creates results in my opinion. These machines don't make a mediocre practitioner a good one. They just help a good practitioner to do a good workup in less time. He mentions many different healing machines of historical significance but does not discuss the Biomodulator of Jerry Tennant which is currently available. It is a Scenar device. These devices counteract factors that cause the body to malfunction such as metabolic imbalances. practitioners love them because the patient has to come in 2-3 times a week and be treated to maintain benefit. Dr Raymond Royal Rife did not do detox on his patients and all of them died of other causes within 5 years just like what happens to people who are cured by conventional methods. DIET AND FOOD ALLERGY Dr Mumby has a prior book on Diet and food allergy. As a result he does not go into the diet suggestions in this book. Other books that would further your research on Dr Mumby's Three Pillars of therapy include The Zone on low carb diets, Books on the Ketogenic Diet, Radical Forgiveness, and books on Infrared Sauna therapy for chemical detox. SAUNAS .I like the use of near infrared light bulbs sold in animal feed supply stores and big box stores . There are web sites that tell you how to build your own sauna with them. The wood saunas are costly and no better than the collapsible tent ones on for under \$300. No book is perfect but this book has information that is not available elsewhere. I thought it was well worth the price. If anyone knows of a better comprehensive book on the subject leave a comment. Defeat Cancer by Connie Strasheim has a lot of good advanced information but it is easy to lose sight of the basic 3 pillars and get lost in approaches that don't work so well if the detoxification has been ignored. The odds of getting the immune system functioning again are poor unless all 3 pillars are addressed. Ty Bollinger's books

are good for some kinds of cancer. People who have not had conventional treatment often recover with detoxification and nutrition.. But Bollinger in The 31 Day Cancer Cure has no discussion of what to do if one has Candida Fungus that has been misdiagnosed as cancer. There are lab tests for fungus that can be run on the biopsy tissue. The MD 's never ask the lab to use them. If the patient has a history of high sugar, high fruit ,or high carbohydrate intake one has to rule out candida fungus before choosing a diet program. The Gerson carrot and apple juice diet will stimulate the candida to multiply. Cancer grows slowly but candida grows very rapidly. If one has a fast growing cancer there is almost always a candida co infection. Bollinger is not a practitioner and so he isn't seeing the big picture from a practitioners view point. Bollinger in his most recent video series had Dr Mercola talk about the ketogenic diet. He really wants people to have all the information available and his covering of the topic is improving.
