Maximize your success rate and reduce complications with CPT codes for each procedure, as well as indications, relevant anatomy, technique, side effects and complications, and clinical pearls. Integrate interventional techniques into your practice with lavish, detailed illustrations that highlight the key steps in each procedure. View line drawings paired with CT, MR and/or radiographic images to illustrate relevant points in the text. Stay current on the latest injection techniques with 19 brand-new chapters including: Brachial Plexus Block - Infraclavicular Approach; Transverse Abdominis Plane Block; Anterior Cutaneous Nerve Block; Lumbar Grey Ramus Communicans Block; Lumbar Grey Ramus Communicans Block - Radiofrequency Lesioning; and more. Visualize proper needle placement with help from an increased number of high-quality photographs. Understand how techniques are performed by watching procedural videos that cover Cervical Translaminar Epidural Block; Cervical Paravertebral Medical Branch Block; Percutaneous Facet Fusion; Lumbar Transforaminal Epidural Block; and more. View online-only chapters accessible via Expert Consult, as well as additional online-only figures, key terms, and abstract sections. Expert Consult eBook version included with purchase. "...the book is a large, sturdy book with clear guidelines on a wide variety of procedures, with good quality colour drawings to clarify anatomy, supplemented by fluoroscopy images, and CT and Ultrasound images...the comprehensive coverage of blocks throughout the body is impressive, and if you wish to own only one textbook on the subject, this is probably the one." Reviewed by British Journal of Anaesthesia, Jun 2015

Excellent pictures including ultrasound and fluoroscopic, and anatomy art throughout book. Many injections that are common covered. Very good discussion of each clinical presentation and pathology.

Great Book.

It's OK

Five stars for the book, one for the videos (and that's being generous) so I averaged it at three. I cannot imagine that Dr. Waldman took the time to approve these videos. A 20 minute video of a cervical RFA, and well over half of it is a video of his hands. I want to see how you line up the image, where your needle entry is, what your target is. I don't want to watch you numb the skin for ten minutes, please tell your cameraman to put the camera on the fluoro image. The book is gold, though, so if you don't need the videos just ignore me.
