Differential Equations With Boundary-Value Problems

Synopsis

DIFFERENTIAL EQUATIONS WITH BOUNDARY-VALUE PROBLEMS, 9th Edition strikes a balance between the analytical, qualitative, and quantitative approaches to the study of Differential Equations. This proven text speaks to students of varied majors through a wealth of pedagogical aids, including an abundance of examples, explanations, "Remarks" boxes, and definitions. Now fully supported by two strong digital learning solutions, Enhanced WebAssign and MindTap Math, the book provides a thorough overview of the topics typically taught in a first course in Differential Equations as well as an introduction to boundary-value problems and partial Differential Equations written in a straightforward, readable, and helpful style.

Understanding & Build Confidence. Examples, explanations, "Remarks" boxes, and definitions all reinforce learning. Relevant Content Design helps you quickly identify resources in the text and emphasizes the application of differential equations in the world around you.

Graphs Reinforce Examples. The four-color design adds depth of meaning to all of the graphics, particularly three-dimensional pieces and visuals that involve multiple curves in a graph. Use

The Text As A Future Reference. The text guides you through material necessary to progress to the next level of study; its clear presentation and mathematical precision make it an excellent reference tool in future courses.

Tap into engagement. MindTap empowers you to produce your best

work consistently. MindTap shows where you stand at all

times both individually and compared to the highest performers in class.

MindTap is designed to help you master the material. Interactive videos, animations, and activities

create a learning path designed by your instructor to guide you through the course and focus on

what's important. MindTap is mobile. The new MindTap Mobile App provides

the mobility and flexibility for you to make any time study time. MindTap helps you stay

organized and efficient. MindTap gives you the study tools to master the material.

Dennis G. Zill is professor of mathematics at Loyola Marymount University. His interests are in applied mathematics, special functions, and integral transforms. Dr. Zill received his Ph.D. in applied mathematics and his M.S. from Iowa State University in 1967 and 1964, respectively. He received his B.A. from St. Mary's in Winona, Minnesota, in 1962. Dr. Zill also is former chair of the Mathematics Department at Loyola Marymount University. He is the author or co-author of 13 mathematics texts.

no surprises that all I ask for

I thought the ebook version had webassign access code, it did not come with it. I'll just buy the physical book at my school.
