First off, didn't realize this was such a short story. Not worth 99 cents. The writing technically isn't bad, but the story is. It's a pablum romance that's a little too sappy for me. Too bad, because the first few pages were enough to draw me in, until we reached where she woke up on the alien ship.

Blech!

This was a great beginning to what I hope will be a long series. The premise was one I hadn't seen before. This made it interesting and fun. I'm looking forward to the next story.

It was okay. Not bad, but not really that grab you and refuse to let you go til you finish it kind of story either. I almost felt like it needed more development. The male lead was very shallow, no development at all to make us care about him or not. The female was very developed. It has potential, but just wasn't brought far enough along.

I would love to review this book better, but I barely remember the story. It didn't leave much of an impression.

T book is ok but what about the romance between the character's a little boring hope book 2 is better

Now I am going crazy because I have to wait to read the next part. This was a great story....it's nice to see as cart playing the hero even if they don't know they are one. Can't wait for the sequel. Interesting take on the alien and the symbiot hairdo. I never thought of the idea of two aliens fused together. They could give hairclub for men a run for their money! $\hat{A}f\hat{A}$ \hat{A} $\hat{A}_\hat{A}$ $\hat{E}\hat{o}\hat{A}$ $\hat{A}\bullet$. It seems to me as though the weird bat creatures are mice with wings. I wonder if the symbiot on their heads decides they hate cats and And start kissing every time a cat walks by that could make for a really interesting scenario. I can see it now cats whizzing by jumping in the air and grabbing that squeak squeak rip tear and In the background you hear the sound of hissing. It could be the easier way to get rid of the cats when the jobs done is just for everyone to lay their head on the ground next to the cats. I can just see it now..... alien race killed because their symbiotic hairpieces jumped off their heads and chased down the cats, resulting in massive blood mayhem and extinction of the cat species as well.

I found book one to be very entertaining. I really like the idea that a human and her cat is going to be able to save some advanced aliens. How refreshing. I don't want to give more away because I think you need to read this book for yourself!

all hail cats... there that out of the way. ther reason i said this is because this book should of been called that due to the hero captian james. i like this book the main lead she was head strong but gullible when it can to the other sex, but she learned and developed as a character.. this is a good book to read
