The book is so good that as I was reading it, I got impatient to start applying for jobs again and writing cover letters based on the author's advice. The value of the author's clear, elegant and well-structured system for writing stand out cover letters becomes evident as you read through the book and the numerous examples he provides. It just makes perfect marketing sense. If you are applying for jobs, this book is a must-read. Concise and to-the point, it nevertheless manages to provide not only practical advice and useful examples, but also strong motivation and an itch to go and try out this punchy stand out cover letter format and the mindset that goes with it.

Really excellent book on how to successfully communicate your skills and interests to a prospective employer. Much more than just about cover letters, the book is also a guide to self-assessment of one's skills, values and interests. The author invites the reader to have the courage to be honest with oneself and authentic in the job search and application process. This is what made the book most valuable to me. There are of course the technical details of organizing and composing the letter, and

details of electronic delivery. Straightforward writing, well organized, no fluff. Highly recommended.

If you are a job seeker or in a career transition, this book is a must read. Resumes, no matter how impressive, won't be the tool that locks in your next position. To be the successful candidate, we really need to set ourselves apart from the rest by providing future employers a Stand Out Cover Letter. These future employers want to know about YOU, your uniqueness, your gifts and what you can bring to their team. Read this book and learn how to craft a cover letter that engages the reader and entices them to want to know more, ensuring you make it to the next step - the interview. In Stand Out Cover Letters, Mark Baker walks you through the process step by step. I found this book easy to read and follow and extremely helpful. It is a business tool that is actually enjoyable to read. I feel privileged to have been able to read an advance copy of the book and have already shared its content with others who are on the job hunt.

This is a great book not only because it was well written, but also because it explains why cover letters are still relevant. I used to think that cover letters were obsolete. So many things are digital now. But the author explains, in a very interesting way, how to write a cover letter and what mistakes I need to avoid. I also like the fact that the author did not explain cover letters to me like I'm an idiot. I hate when business books come across like the author is some all-powerful wizard. This book doesn't do that. It did give me actionable advice and explained why.

As one who has mentored and coached people with their professional development for two decades I highly recommend this excellent book. The author is a professional with direct experience and proven credentials. The book not only gives insight on how to write an effective cover letter, it provides useful strategies for the job search and interviews. It is well organized and easy to read. The downloadable work book is a welcomed bonus. I hope the author will write more books to help job seekers in today's highly competitive workplace.

I really could have used this book when I was out in the work force trying to stand out from the rest of the competition! Your cover letter is your smile, your personality, your value, and your work ethic and should not be taken lightly. Mark Baker has created a comprehensive guide with some amazingly simple exercises that take you through the step-by-step process of creating a cover letter that will make you stand out, and provide the best chance of landing that dream job. What are you waiting for? Your dream job is there waiting for you and Mark Baker will help you land it!

Clear-cut precision and on-the-mark acumen are just a couple terms I would use to describe Mark Baker's latest book. He has plenty of room for the practical advice, but the real jewel in his writing is the power to convince readers that this is more than just writing stand out cover letter; it is about taking on a standout quality for all aspects of life. He encourages you to not just settle for going through the motions; there's no way of growing that way. The man writes with confidence, and much of it will rub off on you by the time you reach the last page. An excellent investment.
