The Truth About Cancer: What You Need To Know About Cancer's History, Treatment, And Prevention

Synopsis

Cancer touches more lives than you may think. According to the World Health Organization, one out of three women alive today, and one out of two men, will face a cancer diagnosis in their lifetime. To Ty Bollinger, this isn't just a statistic. It's personal. After losing seven members of his family to cancer over the course of a decade, Ty set out on a global quest to learn as much as he possibly could about cancer treatments and the medical industry that surrounds the disease. He has written this book to share what he's uncovered—some of which may shock you—and to give you new resources for coping with cancer in your life or the life of someone you love. As Ty explains, there are many methods we can access to treat and prevent cancer that go well beyond chemotherapy, radiation, and surgery; we just don't know about them. *The Truth about Cancer* delves into the history of medicine—all the way back to Hippocrates's credo of "do no harm"—as well as cutting-edge research showing the efficacy of dozens of unconventional cancer treatments that are helping patients around the globe. You'll read about the politics of cancer; facts and myths about its causes (a family history is only part of the picture); and the range of tools available to diagnose and treat it. If you're facing a cancer diagnosis right now, this book may help you and your health-care provider make choices about your next steps. If you're already undergoing conventional treatment, it may help you support your health during the course of chemo or radiation. If you're a health-care provider and want to learn all you can to help your patients, it will expand your horizons and inspire you with true stories of successful healing. And if you just want to see cancer in a new light, it will open your eyes. **Â**

Customer Reviews

“An absolutely essential guide for humanity. The little-known wisdom found in this book can help end human suffering across the globe while saving people from the ravages of the failed cancer industry.”
• Mike Adams, the “Health Ranger” and lab science director of CWC Labs
“Ty Bollinger does it again! After the groundbreaking and paradigm-shifting documentary *The Truth about Cancer*, Ty’s latest book is a comprehensive guide to the cancer epidemic and a holistic solution. Especially intriguing is the information on how sound, light, and electricity are used to boost immune function and heal the body. This book is perfect for those looking to prevent cancer and seeking a natural protocol for treatment.”
• Jack Wolfson, D.O., F.A.C.C.
“Ty Bollinger provides patients, scientists, and health care professionals with an excellent explanation of why our current cancer model is flawed, how cancer can be prevented, and offers a more complete menu of treatment options that are far more favorable on a risk-to-benefit-to-cost ratio when compared to most standard oncology protocols. Use this book as your treasure map to both prevent and reverse cancer. Cancer can be beaten and Ty shows us how.”
• Patrick Quillin, Ph.D., R.D., C.N.S., F.A.C.N., author of *Beating Cancer with Nutrition*
“The Truth about Cancer is a road map to successfully preventing, treating, and beating cancer with God’s medicine chest. In this groundbreaking book, Ty Bollinger sheds light on the plethora of natural ways to promote immunity, fuel the body, and stifle cancer. Read this book. It might just save your life.”
• Josh Axe, D.C., author of *Eat Dirt*
“Ty Bollinger has hit a grand slam with *The Truth about Cancer*. His exploration into the politics of cancer is a remarkably brave look at a desperate situation that affects millions of people worldwide. By presenting comprehensive information in clear, easy-to-understand language, his refreshing, thought-provoking insights are accessible to anyone. If you or your loved ones’ lives have been touched by cancer, this is a must-read.”
• Edward F. Group III, D.C.
“Ty’s *The Truth about Cancer* is truly empowering. The book not only provides patients hope for the future, but it also provides them with the necessary information and resources to prevent and fight their cancer. The first step to healing is self-healing and this book is one of the best self-healing books on the market.”
• Leigh Erin Connealy, M.D.
“This is a magnificent and ambitious book by Ty Bollinger. He doesn’t just

take the medical view; he engages in a massive historical sweep, through centuries of manipulation and scientific abuse, to explain how we have got to where we are with the Big C (cancer). It's been a saying of mine for years that "We are all battling cancer" (you or a loved one is likely to get this disease). Therefore I believe it's vital for everyone to read Ty Bollinger's comprehensive report that really does bring out The Truth about Cancer. • Keith Scott-Mumby, M.D., M.B., Ch.B., H.M.D., Ph.D. "All of the information you ever wanted to know about cancer, the cancer industry and more. Ty Bollinger's new book is a tell-all story of how we get cancer, how it is promoted by the pharmaceutical industry and perpetuated by the standard of care in the medical community. He enlightens us to the multitude of options beyond chemo, radiation, and surgery that are available today! Ty Bollinger's The Truth about Cancer is an evergreen reference guide on cancer that will stand the test of time." • Ben Johnson, M.D., D.O., N.M.D., best-selling co-author of The Healing Code and author of The Secret of Health: Breast Wisdom and No More Gram!

Ty M. Bollinger is a Christian, happily married husband and father, health freedom advocate, cancer researcher, former competitive bodybuilder, documentary film producer, radio show host, and author. After losing several family members to cancer, he refused to accept the notion that chemotherapy, radiation, and surgery were the most effective treatments available for cancer patients. He began a quest to learn all he possibly could about alternative cancer treatments and the medical industry. What he uncovered was shocking. Ty first brought his discoveries to the public in the best-selling book Cancer: Step Outside the Box. He has also co-authored other books on alternatives to conventional medicine. The two groundbreaking documentary series on cancer treatment he has produced • The Quest for the Cures (2014) and The Truth about Cancer: A Global Quest (2015) • have been viewed by more than 10 million people worldwide. Ty has now made it his life mission to share the most remarkable conclusion he has drawn from his quest: the vast majority of all diseases, including cancer, can be easily prevented and even cured without drugs or surgery. This book has been life changing for my family and myself. My mother, grandmother and several other family members all have had cancer starting in their twenties and recurring until they lost their battles. I tried to be preventative by getting my yearly mammograms (since the age of 18.) If only I had known I was actually exposing myself and probably causing more harm. I even had genetic

testing done. The numbers were not in my favor (86%). When I first read and listened to the Truth about Cancer, I had completed the first phase of a prophylactic double mastectomy. I immediately stopped after the first surgery. It didn't feel right in the first place, but it was what was recommended by the doctors in my community. To them, it was my best measure of prevention. After phase 1, I traveled to speak with other doctors and was given the book and docu-series THE TRUTH ABOUT CANCER. It was the best book I have ever read on the subject (and I have read a lot to try to understand and prevent cancer.) I finally had the truth behind my decision. The truth that is backed by data, physicians, and scientists...not money, politics and big pharma. I am grateful for the author's personal quest to expose, eradicate and educate for a cure. I am 38 years old and living a life of true health and wellness because of this powerful knowledge. Fear is no longer lingering in my mind. I am empowered. Thank you!

I have been an RN for 42 years. I have seen every kind of medical care and many catastrophes . I highly recommend this alternative "look" at cancer care. It is enlightening and empowering ! It is apparent that mainstream cancer "cure" is not what we need. We need prevention care. And if we have a diagnosis of cancer and alternative method of care that makes sense ! Bravo Todd !!

Ty has dedicated his life to educating the world and giving hope where there was none. He helped save my life because I wouldn't have known about thermograms (vs mammograms), which lead me to a high risk cancer diagnosis that otherwise wouldn't have been seen until it was too late. Through early detection I have a running start to beating a cancer diagnosis! Please read this book, watch the documentary, and go to his site. Thank you Ty & Charlene!

This is a Bible of information which should have a place in EVERY home for reference. Sadly the majority of folks just believe all the lies fed to us over the media and think that if conventional approach was so bad then we would definitely know about it... fair comment - I thought exactly the same. However, once you dig deeper and have read through this book you will have the knowledge to then make informed decisions which may well save your life or the life of your family members.. I was fairly disinterested until I had a cancer diagnosis which was false and it made me take my health into my own control and not believe ALL we are told by media and doctors alike. There is a saying 'what you don't know, you do not know' - so true. It takes too long to trawl through websites and sort fact from fiction. This has been done for us and is in one book - I for one am so grateful to the author for dedicating many years to researching and presenting it to us so clearly. Any

proclamations by health 'industry' should be viewed with an open mind and always 'follow the money' before you decide whether you are being told the truth or lied to.... easy when you know how to unravel this!!The reason that word is not getting around quicker is that most folks think you are a little odd when you mention that there are many Cancer cures across the world and often friends and family just distance themselves from talking about the subject which is upsetting and frustrating - just get the book and look forward to not being so scared of Cancer and other illnesses which plague society.If you are still a sceptic - take a chance, buy it anyway and make your own mind up - I promise you will not regret being enlightened.

I have never been a gullible person - That's why my office desk has a large scribble stuck up on the wall with the words "and the reason is?" next to me. Therefore, when I discovered a bump in my boob at the age of 64, which was confirmed by the mammogram (Ygggg) and I was frightened into surgery within a few days - the slash part. Recovering after the op, I was lying in bed googling "real hair wigs" on my i-pad, thinking that that was the next step. By chance, my cursor hovered over the word "chemotherapy" and took me to a site - one that has changed my life. The Truth About Cancer began a journey of truth and understanding for me. Friends and family urged me to "at least go and see the oncologist". Under pressure, I entered the oncology centre in Durban, South Africa, to be met with the sight of yellow shuffling corpses feeding their limp bodies with coca cola, chips and sugary doughnuts from the vending machine in the centre. That confirmed it for me - I turned heel and ran as fast as I could. For two weeks I combed the internet, book stores, on-line journals etc for information that I could trust, because clearly I could not trust the doctors. As I am typing this, our very own Tim Noakes has just been found guilty by the SA Medical Association of advising a mother to wean her baby onto a low carbohydrate, high fat diet. So you see, it's happening here in South Africa as well! Thank goodness Sweden are informed and have adopted the Truth. My very own family doctor who had happily advised me to have the 31 mammograms and told me that he hoped I was not going the "snake oil route" when I told him that I had rejected chemo and radiation, comes to mind. Although I have a Masters in Food and Nutrition, I realised as I researched, that I actually knew absolutely NOTHING about the body and the healing power of nutrition. (In fact, the Food Pyramid that we learnt about in the 70's has been turned completely on its head, with the Ketogenic Diet etc). It was the information that I found through Ty Bollinger and his awesome team, that gave me the truth I was looking for. I found myself an awesome Ayurvedic Doctor who practices integrative medicine in Durban (I darn't name him in case the FDA take him out as well). Everyone should have a copy of this book in their homes - and one for friends and family members. It's the

best gift one could give to others. Thank you TTAC team. The world needs you all.
