Customer Reviews

Book Details:Format: PaperbackPublication Date: 6/1/2004Pages: 144Reading Level: Age 12 and Up

This workbook was written for middle school and high school slow learners. However, it is also good for grades 3-5 and adult and second-language groups. The independent seatwork exercises can be used with limited teacher supervision. This worktext is written at a third-grade reading level. Contents by chapter:Unit 1 MatterUnit 2 Changes in MatterUnit 3 Nature's EnergiesUnit 4 Sound and LightUnit 5 Magnetism and ElectricityUnit 6 Motion and ForcesUnit 7 MachinesUnit 8 Technology

I used this book early in my teaching career. So glad I found it!

Lost mine. I remember to try because I have reading all summer. I did and I was so excited that I

could find what I wanted to use for my high school .

I love this series and had misplaced my book. I wanted to keep a complete set available. This series you will use a lot.

Very helpful book.

I'm currently using this book to teach third grade science to my son. He loves it! I find it easy to use. One topic per page with a question and answer session for each topic. We do one page daily. I'm not using the teaching manual and probably won't. Book itself is pretty self-explanatory. Book is easy for my son to read. He's been known to pick up and read the book on his own. I would definitely recommend it.
