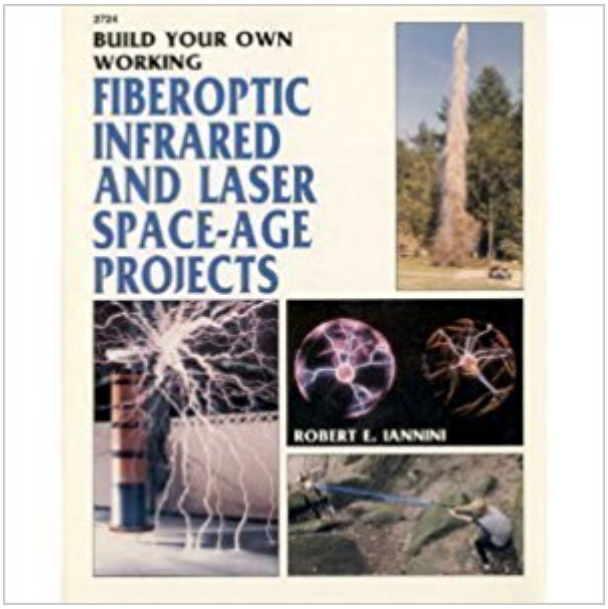
Build Your Own Working Fiberoptic Infrared And Laser Space-Age Projects



Synopsis

Now electronics hobbyists can put aside ordinary, everyday electronics projects and start building something really exciting. They can probe the possibilities of high technology-lasers, fibroptics, and high-voltage electrical devices; discover the challenge and the satisfaction of building sophisticated and practical electonic and scientific devices for a fraction of the comparable commercial cost. And they can do it all far more easily than they ever thought possible.

Book Information

Paperback: 288 pages

Publisher: Tab Books (February 1987)

Language: English

ISBN-10: 0830627243

ISBN-13: 978-0830627240

Product Dimensions: 0.8 x 7.5 x 9.5 inches

Shipping Weight: 1.1 pounds

Average Customer Review: 3.8 out of 5 stars 4 customer reviews

Best Sellers Rank: #774,386 in Books (See Top 100 in Books) #22 inÃ Â Books > Engineering & Transportation > Engineering > Electrical & Electronics > Fiber Optics #120 inÃ Â Books > Science & Math > Physics > Light #299 inÃ Â Books > Science & Math > Experiments, Instruments & Measurement > Experiments & Projects

Customer Reviews

Descriptions of projects are very brief and obscure. To get close to building any of these projects, you need to already have a good understanding of how it works. I would not suggest this book for anyone.

Because my husband is over the moon that he finally has the book that he could not find anywhere in Mandurah Western Australia.

If you want to know how to build a laser,or are looking for a hot project, than here’s your book. I enjoyed this book very much, because of the oppertunities it gives you to "go" with. Find a project, then we’ll show you how to build, is the way this book is setup. Written user friendly!

If you want to win a science fair or if you just want to have a laser scope for your rifle, this is the

book to get. It is also helpful in building the most impressive laser tag gun ever, if I had the technology money and knowhow. I just want a review to raise my rank.
