## Customer Reviews

Richard Taylor is a well-known artist, author and teacher who has written many practical art books, including *Natural Watercolours*, *The Watercolourist's Guide to Painting Buildings* and *The Creative Drawing Course*. His articles have appeared in a number of leading UK art techniques magazines, including *Artists & Illustrators*, *The Artist* and *Leisure Painter*.

Great Book on Drawing and Painting. I know I will enjoy every minute of it. I will continue to order books and tapes from . I am never disappointed. Thank you very much.

I bought this book to help with my outdoor sketches. The book is roughly divided into three parts. The first talks about the materials. The examples featured mainly uses pencils, ink and watercolour. The second part looks at drawing small subjects like bricks, tiling, textures. The last part explores various building styles. The coverage on perspective is very basic. There are the usual 1, 2 and 3 point perspective all covered in 6 pages. I was expecting more from a book on buildings. There aren't any tips on dealing with tricky perspective, like drawing buildings with vanishing points off the paper. There are plenty of drawing tips accompanying the examples. Those are helpful and the techniques are easy to follow. The downside of the book is it doesn't teach you how to observe proportions, and the examples are mostly on observational drawings. Those with basic drawing

knowledge would gain more from this book.(There are more pictures of the book on my blog. Just visit my profile for the link.)

Richard Taylor explains in depth and great detail how and why he draws the various sketches, which are many. There are several projects, which he fully explains how he created and completed.He covers a wide range of drawing materials, including pencils - graphite and coloured, water-soluble; graphite powder; pen line and wash; pen and colour.I was so impressed with this book, I have since bought 'The Watercolourists's Guide to Painting Buildings' and 'Painting Houses & Gardens in Watercolor' by Richard Taylor, which are both equally excellent with beautiful watercolour illustrations.

I love the way this author demonstrates watercolor.

As an artist who has had the opportunity to study and sell my work in the USA and Europe, I've also had the opportunity to use many references, photos and the like as studies for much of my work as well at the real thing. I don't care for these types of book at all, they are lacking so much, highly recommend the student artist to get out there and see the object for themselves, take a moment to see what you are looking at, find the colors in a cloud and then paint it, allow yourself to think, to see, to find. It's not in a book. Go to a park, to the country see it for yourself, paint and draw what you see and feel.
