MediQuik Drug Cards

Synopsis

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. MediQuik Drug Cards, the card deck companion to Nursing 2015 Drug Handbook, provides concise drug information in a handy card format. Nursing students preparing for the NCLEX and practicing nurses who need a quick reference to specific drugs will find this deck a valuable tool, with a plastic sleeve for carrying selected cards, the drug cards offer important drug information, including generic and trade names with pronunciations, indications and dosages, contraindications and cautions, and much more. This new edition features: Tall-man lettering for easy-to-confuse generic drug names; Overdose signs and symptoms; and an Appendix on vitamins. The Nursing Process is used to address patient assessment, key nursing diagnoses, planning and implementation, including patient teaching and evaluation of patient outcomes. Additional cards addressing available forms and indications and uses of vitamins are also included. Users of MediQuik are provided access to a free Online Toolkit featuring study aids and practical tips on drug safety and administration videos, pharmacology animations, over 300 NCLEX-style questions, drug pronunciation guide, English-to-Spanish audio translation guide, patient-teaching sheets and a dosage calculator.

Customer Reviews

Whether you are a med student or a nursing student, these are a life saver and will be well worth the

purchase saving you more time to study. 300 drug cards, a ring, and a pouch come in the container. It has online resources, herbal drug guide, pharm. videos, strategies, tables, therapeutic guidelines, risk evaluations and so much more. These are well worth the money and comes with many resources.

These are excellent cards for nursing school. They have all the info on them that you need. I went ahead and highlighted on them exactly what our classes require. They come hole-punch and with a ring to put them on for easy carrying. Great asset for nursing students. Saves lots of time instead of having to write all the med cards.

I needed these for my clinicals in the nursing program. While they don't contain all the info I need, most of it is on the cards. Not all the meds listed in the drug guide are in this pack but so far out of the 70 drugs I've had to research and know I've only had to actually make new cards for around 8-9 of them. And there is a little space on each card if a few things need to be added as well as a few blank cards to start new ones where needed.

I am a nursing student. I use these for my care plans, and for various assignments. I love them! I have been recommending them to my classmates left and right. The little baggy they come with is nice too; I put the medications for my clinical day in there just in case I need to review them. The best part for me has been the "effects on lab test results." It helps tie everything together and speeds up care plans.

These are great and everything you need for nursing school! Only been a couple so far that I had to look up elsewhere. I posted these for my class and they love them!

Love the cards and would recommend them to anyone entering the nursing field

These have been very useful for studying as well as clinical prep in nursing school. I have been very pleased with the variety and comprehensiveness with the set. I wish there were some way of expanding the set however to include more cards with updates.

Awesome resource for nursing school. Easy to find medication you need by using index. Has all info you need to complete care plans. Comes with a clear carrying envelope and clip ring to carry some

cards with you to clinical.
