Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

This map leaves a bit to be desired. The map has eastern side of the island on one side and the western side on the other. My intention was to hang this up in our house and pin all the places we visit while we're here. This is no longer an option due to the dual sided map. The material is good and appears to be waterproof.

Excellent map. Each side of map divided into either East or West side of island. Map's large scale reveals all the small villages, tourist sites, and anything else you might wish to find.

This wasn't really helpful. I got better maps online. Adding the KTEL bus lines in would've made this indispensable.

Good maps to plan the base route for motorcycle holidays

It had everything I need

Great map, my son wanted it for his trip to Crete. Exactly as described and high quality - it arrived really fast!

Well done map. Easy to read and seems very accurate.

I really liked this map. We had several maps with us, but I chose to use this one. It was up to date as of June 2017. We used it to travel all over the island. As you know, it's not always convenient to use GPS when signals are weak and the island doesn't have the most stable signal. Plus it was an extra \$200 just to add a GPS to the rental car, so I'm really glad that we came prepared. I found that the locals were able to read the map well. This was helpful at points since we decided to do several driving tours and came upon a wrecked, washed out road. Other than that, the roads were pretty reasonable to drive. The signs are all covered with graffiti so having a good map is very helpful. I'm
