Customer Reviews

I love this science text- As a biology major and a professional that tutors and helps local teens with their science curriculum- this book is fantastic! It is easy to read, concise and the chapter summaries make studying a breeze!! highly recommend this book whether for homeschoolers or to supplement the county curriculum. It is top notch!

To be honest I love science especially if its about life and stuff like that.

school

This textbook came in better condition than was advertised. I decided to buy used textbooks, but wanted very good quality, so that is what I paid for. The book was better than expected, in excellent, if not new condition and the shipping was prompt.
