I could only see about one fourth of the page at a time. I advise getting this in paper only. What I could see seemed possibly useful so I will give two stars.

Book is like new! Great seller and super fast shipping. Honestly for those who want a basic primer on Lettering, this is by far the best book out there for total and true beginners for kids and adults!! Start with this book then go to the other books because most of the adult books are more inspiration and not full ABC's of different lettering styles!

There are some cute samples of lettering in this book, but I found it difficult to apply the strategies found in the book. I have not been able to master any new lettering styles. It is a fun book to look at, but not very useful for learning new lettering styles for me.

This book is so much fun! My eight-year-old loves it and is now looking for calligraphy equipment. They've got a lot of new information in there that I didn't know when I tried to learn title lettering as a kid. Now I just need to find a kid's design book!

I was expecting a book much thicker than this one. didn't feel it was clear that there are 40 pages.... so 20 pieces of paper in the whole 'book'. most color books or even magazines are thicker than this is.

It was so colorful and inviting on the cover and on the inside it was all black. Not enticing for kids.

Bought it as a gift for someone, she loves it. Even though it is a "kids" book, she said it is great.

This book is terrific!! My very artistic 13.5 y.o. daughter dove right in. She already knows a lot of lettering styles, but this book provides TONS more. She tried out a few and made me a card showcasing her new skills. :) I also like this book because I am NOT skilled at lettering and I love the ideas and very clear directions. The author breaks down the process in such a manageable way. Wish I had ordered this book sooner, but glad to have it and enjoy for years to come. Two thumbs way up!
