"Anyone looking to make personalized gifts will love the simple, colorful projects found in this book."-Crafts 'n Things

Meagan Lewis is a San Francisco-based printmaker who specializes in stamp carving. Her custom stamps are sold on Brown Pigeon, her Etsy shop, and have been featured in dozens of blogs.

What a cute and fun book! This little book is bound to inspire the artist and craftsman within you. I was raring to go after reading through the introduction and even before getting to Chapter 1. And the organization is wonderful as the author leads you from the easier projects on into the more

advanced, fanning the flames of creativity!

It didn't have quite what I was looking for, but it will be a great resource book. The price was right and it was in great shape!!!

This book is great for beginner crafters who would like to learn how to make or personalize their own gifts and accessories. There is a good introduction with basics on materials and tools, as well as useful information on good combinations of materials (ink, paint, ink pad) to go with different printing methods and surfaces. Author Megan Lewis also gives a quick tutorial on carving rubber stamps - something you will need to know how to do for many of the projects. Lewis guides the reader in making or personalizing a variety of objects, from stamped bookplates and foam stamped journals to storage boxes and pillow cases. The project involve different types of stamping (repeat pattern stamping, negative space printing, reduction printing), as well as printing with objects like bubble wrap, cut foam, moldable foam stamps and string. The projects are quite easy and templates are provided for many of the stamp patterns, but some of them may require a bit of practice before you can carve them perfectly - if that's what you prefer although the imperfection of handmade objects is often what makes them just perfect! The instructions are clear and easy to follow although they are mostly written. The accompanying drawn illustrations are basic and not a detailed step-by-step guide for anyone who might prefer more visual instructions. Lewis' designs are very cute and simple to execute - excellent if you want to put your stamp on things you have bought or have made yourself, but have no idea how to do so. This book may not be as useful for experienced crafters though as the techniques are quite basic.

I recently received this book and I am so excited! I have purchased stamps from the author on her website at [Etsy.com](https://www.etsy.com), and I have used them for letters, cards, correspondence, notes, wrapping paper and gift tags. I can't wait to try stamping an apron and maybe pairing the apron with some cute stamped kitchen towels for Christmas presents. The photographs are beautiful and the instructions are very clearly written, along with some tips and suggestions. I love how the projects are listed by skill level! It helps!

Megan's book "Put Your Stamp On It" has shown me that I too can be creative. If I can think it, I can make it! It takes just a few little steps and I can make inexpensive but meaningful gifts for the people I care about. Before I saw this book, I had no idea how to create cards or stamps from scratch. You

make it so easy! Your books shows how to add that special, personalized touch. Thanks Megan for your GREAT ideas. Now I am looking forward to your next project!

Very excellent book if you want to learn to hand carve your own stamps. It is not an easy process and the author gives detailed and easy-to-understand directions on how to do so. The book also has numerous cute stamping projects. Additionally, the layout of the book is very visually pleasing and accessible. Overall, very pleased with this book.

VERY GOOD PRODUCT
