GREAT

This book is the best book I have ever bought (actually received as a gift). It is a completely fascinating account of historical events as related to religion, scripture, law, man, humankind and the push of the Roman Justinian and their code of civil law in order to do away with the Gods law, the law of Nature, and maintain the status quo. This book has not left me disappointed even for a second and has kept my attention thru the 310 pages out of almost 1000 pages that I have read so far. You will be intrigued, fascinated, hopeful, educated, angered, and ponder in disbelief. This book is pure knowledge and information. If you want to know what is really going on in the world he tells you all about the two antagonistic forces at play here. You will discover a new realm of history they never taught you .. For their own good!

This will refresh our minds on the principles upon which our country was founded. It is good to have as a reference as we become more global.

This is probably the most informative book I have ever read in my life. It is not light reading and is researched and noted on each page with history and chronology that I have seen nowhere else. Should be a required learning book for all lawyers, judges, and any officers serving and for the common man and woman knowing what the common law is versus what is pitched around and bandied about as common law is a real eye opener. The reasons for many things going on today will become crystal clear upon taking the time to read this book.

very well foot noted book
