Public Finance (The Mcgraw-Hill Series In Economics)

Synopsis

Public Finance benefits from the combined efforts of Harvey Rosen's market-leading book and co-author Ted Gayer's research and government agency experience. This combination of experience is able to explain as clearly as possible how the tools of economics can be used to analyze government expenditure and tax policies. This new edition incorporates recent developments and along the way takes students to the frontiers of current research and policy. While the information presented is cutting edge and reflects the work of economists currently active in the field, the approach makes the text accessible to undergraduates whose only prior exposure to economics is at the introductory level. All of the changes in the Tenth edition were made to further the authors' goal of providing students with a clear and coherent view of the role of government spending and taxation. The authors' years of policy experience have convinced themselves that modern public finance provides a practical and invaluable framework for thinking about policy issues. The goal is simple: to emphasize the links between sound economics and the analysis of real-world policy problems. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Book Information

Series: The McGraw-Hill Series in Economics

Customer Reviews

Ted Gayer is vice president and director of the Economic Studies Program and is Joseph A. Pechman Senior Fellow at George Town University.

Needed it for a class. It was as described. Would I buy it again. NO! I got my grade and damn my professor was tough!

Book appeared to be brand new. It was a great deal to rent it from you.

great experience, just as described, AAA+++

Book came in great condition. No problems

It was good nice book

Great Condition

Needed this for class. Quick shipping, excellent quality. Makes Public Finance interesting (at the margin)
