RealWorld Evaluation: Working Under Budget, Time, Data, And Political Constraints

Synopsis

This book addresses the challenges of conducting program evaluations in real-world contexts where evaluators and the agencies face budget and time constraints and where critical data is missing. The book is organized around a seven-step model developed by the authors, which has been tested and refined in workshops. Vignettes and case studies—representing evaluations from a variety of geographic regions and sectors—demonstrate adaptive possibilities for small projects with budgets of a few thousand dollars to large-scale, long-term evaluations. The text incorporates quantitative, qualitative, and mixed-method designs and this Second Edition reflects important developments in the field over the last five years.

Book Information

Paperback: 712 pages

Publisher: SAGE Publications, Inc; 2 edition (November 29, 2011)

Customer Reviews

This book represents a significant achievement. The authors have succeeded in creating a book that can be used in a wide variety of locations and by a large community of evaluation practitioners.

--Michael D. Niles (10/26/2011)"This book is exceptional and unique in the way that it combines foundational knowledge from social sciences with theory and methods that are specific to evaluation.

--Gary Miron (10/26/2011)"The book represents a very good and timely contribution worth having on an evaluator's shelf, especially if you work in the international development arena.

--Thomaz Chianca (10/26/2011)"Best text I've found for introducing evaluation design AND critical thinking, especially as it relates to current and generally accepted practice, as well as the crucial grounding in real world concerns.

“This book represents a significant achievement. The authors have succeeded in creating a book that can be used in a wide variety of locations and by a large community of evaluation practitioners.” (Michael D. Niles 2011-10-26)“This book is exceptional and unique in the way that it combines foundational knowledge from social sciences with theory and methods that are specific to evaluation.” (Gary Miron 2011-10-26)“The book represents a very good and timely contribution worth having on an evaluator’s shelf, especially if you work in the international development arena.” (Thomaz Chianca 2011-10-26)“Best text I’ve found for introducing evaluation design AND critical thinking, especially as it relates to current and generally accepted practice, as well as the crucial grounding in real world concerns.” (Mara L. Schoeny 2011-10-26)

Really great handbook for evaluators. It can serve as an introduction to evaluation for a relative beginner or can be used by higher-level experts stuck on a certain topic. The worksheets in the appendices are great. I really enjoyed reading this. Fantastic resource for international development

evaluation specialists

Got this book on Kindle app but it doesn't display the page numbers. It goes by sections only. I am very Tech-Savy and did plenty of research but the author didn't include the page numbers so it doesn't come up in the application. If this is for class, it is very difficult to follow along when professor asks you to go to a specific page number..

This book was the assigned text for a doctoral course in policy evaluation in a college of education. The book lays out a thoughtful process for program evaluation, and this was easily adapted by the instructor and students to apply to the policy analysis domain. The book is well-organized and uses easy to understand concepts and flow charts that could assist anyone charged with a program or policy evaluation. This book will be a reference book on my shelf for many years in the future.

Difficult read, referenced it for class very little

Book was needed for a college course. Arrived in excellent condition without markings and ready to use.

Good overview, may not be quite "real world." But helpful in framing the world of evaluation and the struggles to gather quality evaluation findings.

I love it. It was in a very good condition!

Great condition!
