The Professional Medical Assistant: An Integrative, Teamwork-Based Approach (Text With CD-ROM)

Synopsis

This new textbook uses a multidisciplinary, integrated approach to learning that truly reflects the real world in which MAs practice, whether they're focused on the front or back office. From beginning to end, it offers comprehensive, competency-based coverage, complemented by an emphasis on multiple learning styles to better meet the needs of your students. Mastery of all the knowledge and skills that lead to CMA(AAMA) or RMA certification, plus flexibility, versatility, teamwork, and professionalism in the workplace, are the hallmarks of a successful and rewarding career as a Medical Assistant. Our integrated front- and back-office approach provides the foundation for success.

Classroom building blocks

- medical terminology, body structure and function, and pharmacology.
- Lab and clinical building skills through hands-on practice.

How it Works

- Integrated Approach

I'm studying to be a medical assistant and this is the textbook for the first semester for introduction to medical assisting course. The book is so expensive at my college so I found it online for cheap. This book serves its purpose. It doesn't come with the DVD so if you need that don't get this one. Other than that, it's a great book. The textbook is super heavy though so don't be surprised!

fits perfect

very nice quality...looked brand new....what I needed for class. I would recommend this product for any student in the nursing program.

The book was chewed up the ends and some of the pages

great textbook

good

A+, fast and well packed shipping; as described.

I learned a lot but after talking to the direct of the program/advisor I found out in one of the classes this book came with activities to do online and had its own quizzes made up already. A lot of us had trouble with the quizzes and exams because the way the questions were asked, it's a good thing but

it's also a bad thing for some students. I have a learning disability and when I took the test that came with the instructors book, I was so confused what they were asking and overwhelm. The funny thing is I took a class before this class I'm talking about now and the professor made her own test and I did very well every test. My thing is these people who make the book and the test should think of the students who have issues processing the information especially when it comes to the test questions. I still prefer the old Kinns medical assistance book.
